Parents pack a snack

Discovery Programs

FALL 2022 - LOWER/MIDDLE SCHOOL

ARCHITECTURE WITH 3DUX DESIGN

Instructor: Makayla

Kids use the architect's toolset (and lots of cardboard) to design and build an entire sustainable community. From the tiny house geometry challenge to engineering adaptive playgrounds, students have a blast while developing STEM and 21st century skills.

CHEER & HIP HOP

Instructor: Stephanie

Stephanie looks forward to teaching and sharing just why she loves the arts of dance and cheer. She specializes in hip-hop and pro-league dance classes.

CHESS

Instructor: Gale

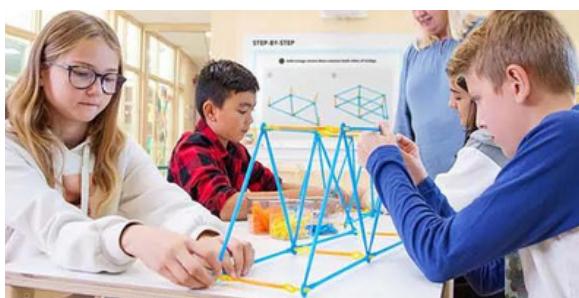

Chess classes and lessons are based around our original, fun, and high-energy Chess Wizards curriculum. Regardless of a child's ability Chess Wizards makes chess fun for all!

DRAMA

Instructor: Morah Ari Golden

This Kindergarten-8th Grade intro to stagecraft and physical performance aims to improve confidence, communication and creativity skills. Age appropriate movement games, theatre terminology and scene work will culminate with an end-of-semester performance!

STRAWBEES - STEM

Instructor: Makayla

Strawbees is a construction set, which means it's made to build things. However, we use Strawbees as a medium for students to creatively express, test and share ideas.

Please note: Fees are non-refundable once classes begin.
