Would you like to tell researchers about how you take care of your asthma?

Welcome to the **Understanding the impact COVID-19 has on asthma management among Native Hawaiian adults with asthma** study. The purpose of this study is to learn how Native Hawaiian adults with asthma manage their asthma during COVID-19, understand the impact COVID-19 has on asthma management, and to discuss more about knowledge and intention to practice preventative behaviors to prevent COVID-19 and severe complications related to having asthma.

A talkstory group session will last about 60-90 minutes. It will take place via zoom. In appreciation of your time, a \$20 gift in the form of a link will be provided.

Information gathered from these talkstory group sessions will contribute to understanding knowledge, attitudes, beliefs, and practices related to asthma management during COVID-19 and discuss behavioral practices and vaccinations as an option to prevent COVID-19 infection.

This study is being done by Donna-Marie Palakiko, PhD, RN, APRN. Donna-Marie is a nurse and faculty at the University of Hawai'i at Mānoa in the Department of Nursing.
