

Kick-Start Your Career in Clean Energy

Are you looking for a well-paying, meaningful career with growth potential?

Come learn about our free training for jobs in the solar industry! Apply now to join our 2026 Cohorts:

08/10 - 09/04 & 10/26 - 11/20

Train to Become a Junior Solar Installer

Goodwill now offers hands-on training for residential solar and storage jobs. The fast-growing solar industry has a high demand for knowledgeable installers who can hit the ground running.

If selected for this training course, you will participate in an intensive four-week solar and storage program, which includes a commitment of 40 hours per week. At the conclusion, you will earn industry-recognized certifications and receive job placement support.

You will also benefit from a host of wraparound support services to meet your unique needs. From access to transportation, mentoring and other services, we can connect you with what you need before, during and after your training.

This opportunity provides paid, hands-on experience that will allow you to begin your new career.

Here's what you'll learn:

- Electrical energy fundamentals
- Safety standards related to solar and storage
- Solar and storage installation basics
- Steps to commission a solar and storage system
- Common solar and storage maintenance tasks
- Solar site evaluation
- Customer service excellence

You'll graduate with industry certifications in:

- Workplace safety (OSHA-10, CPR/First Aid/AED)
- Construction basics
- IronRidge's Solar Installer certification
- GRID Alternatives' certificate in Solar and Storage Installation Basics
