

# **ROBEL: Successful Newcomer in North American Track**

## **Our Story:**

For more than a century, ROBEL machines have successfully been working on railroads around the world. With a proven track record for safety and reliability, it was only a matter of time before ROBEL ventured into the North American Market. ROBEL North America Corporation (RNAC) located in Edison, New Jersey, now distributes the complete range of ROBELs world renowned track maintenance machines for the USA and Canadian markets. Chris Drew, President of RNAC who has been involved in the North American rail market for over twenty years, recently participated in the first ever virtual AREMA trade show and was overwhelmed by the positive response: “Due to the unrepresented times, the AREMA show went virtual for the first time in history. The commitment to a new form of business shown by AREMA and the participants proved to be a success. As a new player in the North American market, RNAC has already been able to bring to market our advance range of battery technology tools.”

## **Battery Powered Track Maintenance:**

Environmental impact and workforce safety are a driving force for battery technology within our industry. ROBEL provides eco-friendly battery concepts with zero emissions, and better ergonomics without compromising performance.

ROBEL offers the following battery-operated products:

- Rail Drill
- Tamper
- 1” Drive Impact Wrench
- Spike Puller
- Band Saw
- 16” Disc Cutter
- Profile Grinder
- Hydraulic Battery Pack for Rail Sheering & Rail Stressing

## **ROMITAMP 2.0:**

The ROBEL ROMITAMP 2.0 works in both forward and reverse directions without the need to turn the machine; improving speed and safety of the operation. The ROMITAMP only requires one operator for efficient and low-cost tamping. The ROMITAMP comes available with the option of lift and line, as well as the option of having a built-in measuring unit. The ROMITAMP is able to self-drive both on and off a transport trailer and track without the need of any lifting cranes.
