

# NEWS & UPDATES

## THORNTON WATER IMPACT REPORT

Your water system has many moving parts and our fundamental goal is to provide our thriving community with a safe and reliable water supply.

Your water utility is comprised of 107 dedicated employees in a variety of divisions that are trained and responsible for carrying out intricate and specialized tasks.

**This report** provides our customers with detailed information about our 2022 accomplishments and impact that ensured your consistent and reliable water services last year.

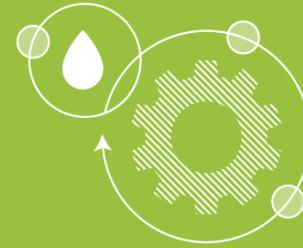

## H<sub>2</sub>O HEROES

### MEET TIM!

Tim is a Utility Maintenance Specialist with an entirely different view of our water system. He performs video inspections of the sanitary sewer system using the CUES TV truck, a specially designed vehicle that enables precise video monitoring of the infrastructure. He enjoys working with the unique equipment and his team to get the job done.

Off the clock, Tim relaxes doing small engine repairs.

## FALL H<sub>2</sub>OVERHAUL

### Plan now and get a Rebate

Transform a section of your yard into a water-wise landscape and receive up to \$2 per sq. ft. in return.

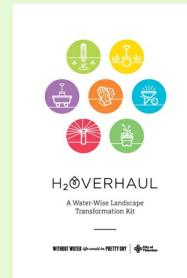

Fall is the perfect time to plan and prepare for your landscape transformation, and we have the resources to help:

#### [Water-Wise Landscape Rebate](#)

#### [H2Overhaul Kit](#)

#### [Landscape Designs](#)

#### [Irrigation Controller Rebate](#)

According to **Resource Central**, there are great reasons to plant in the Fall:

- Warm soil temps mean rapid root growth.
- Milder air temps mean less transplant shock.
- Short, bright days allow easy plant transition.
- And you get a jumpstart on Spring!
