

What things are monopolizing on your time?	What is your biggest challenge right now?	What potential update / challenge / repair are you most worried about happening in the near future?	What content would you like to see as a conversation or continuing education topic?	Additional Comments
Meetings and data analysis Service contracts	Resources to perform the work. Janitorial	electrical upgrades Getting proper figures for future budgets	Trade Contractor Resources Most any fm topics	
finding good people to hire, leadership development	hiring	The biggest thing that KC is facing many people aren't aware that its coming. 2024 Begins the work on the new battery plant in desoto. The Midwest has neve seen a project this large. This country hasn't invested this much money in manufacturing since the industrial revolution. Construction Trades are going to experience a severe shortage over the next couple years as they build this plant. Shortage on the construction trades means longer wait times for services to our local KC companies. our FM's need to be prepared.		
administrative tasks	people management	climate change: weather related damage	climate change, weather related events that affect facilities management	
updating our SLTs	redesigning existing space into larger collaboration space	converting outsourced tasks back to insourced tasks and keeping staff productive	Best practices in building safety, safe/health environments for employees returning to the office	
ifma	ifma	FDA continuing to post pone the decision whether to return to facilities	Finance, Real Estate, Things happening around the city and great tours.	I'm not sure this survey is written correctly. Are you asking me what products and services I need from my fellow members--thus what Associates I want to see at the Speed Dating event or what are my educational needs?
Capital budgeting for next year. Supporting the new and evolving needs of the business with remote and hybrid work.	Implementing a CMMS system. Create business case to no longer use IT platform.	Selling more buildings, reduced square footage to maintain.	Tour a large data center. How to build an Annual Facilities Report. Class on reading blueprints. IoT and AI technology impact on FM.	Thanks for the opportunity to provide input.
Optimizing extra space freed up by remote workers. Bid process	Satisfying the post Covid employee with amenities and collaboration space. Budgeting	Re-stacking to free up leasable space HVAC Software	Amenities for staff and electric car charging stations	Thanks
Emails, doing other peoples work.	Not having a maintenance person, virtual work, nobody in the building. Lack of communication from executive committee.	Lack of skilled workers. Nobody wants to work, even contractors and vendors don't show up on time.		
A new electronic control upgrade in a building RFP's and	Long lead time on major equipment finding time for the in-house PM things like building inspections	Dealing with a boiler and a chiller new HVAC and BAS in 3 facilities		
Staffing	Staffing, and lack of candidates	buildings are still only partial occupied	Workforce development, Life Safety	
Lots of emails.	Finding talent, paying them a competitive wage.	Renewable energy, unreliable energy.	Solar options.	Thank you.
