# Geomedicine

## The Fundamentals of Health and Place

Friday, June 1, 2018 9:30 am - 2:30 pm Texas Medical Center

For More Information: https://is.gd/geomed2018

## **COURSE DESCRIPTION**

The collection, analysis, interpretation, and presentation of geospatial health data require the use of geographic information system (GIS). When used optimally, GIS is a powerful information management tool for analysis and decisionmaking across the biomedical research and healthcare delivery continuum.

The primary goal of this course is to provide a comprehensive introduction to geomedicine and GIS applications in the healthcare field. Course is designed for healthcare professionals with primary roles in clinical care and research who have little to no training in geospatial analysis or geomedicine.

#### **COURSE INSTRUCTORS**

Abiodun (Abi) Oluyomi, MS, PHD

**Assistant Professor** 

Environmental Health Service Dept. of Medicine Baylor College of Medicine

## Linda Highfield, MS, PHD

## **Associate Professor**

Center for Health Systems Research, Policy, and Practice Dept. of Management, Policy & Community Health UTHealth School of Public Heath

## Kai Zhang, MA, MS, PHD

#### **Assistant Professor**

Southwest Center for Occupational & Environmental Health Dept. Epidemiology, Human Genetics & Environmental Sciences UTHealth School of Public Heath

This course is organized and sponsored by: UTHealth Southwest Center for Occupational & Environmental Health, BCM Environmental Health Service and BCM Center for Precision Environmental Health.
