

Port of Los Angeles

The Port of Los Angeles is America's Port®, the nation's premier gateway for international commerce and the busiest seaport in the Western Hemisphere. Located in San Pedro Bay, 25 miles south of downtown Los Angeles, the Port encompasses 7,500 acres of land and water along 43 miles of waterfront.

Currently in the midst of a multi-year, \$650 million infrastructure investment program aimed at raising the bar for cargo efficiency, the Port is also focused on new technologies to enhance digital information flow throughout the supply chain.

This thriving seaport is also known for groundbreaking environmental initiatives and remains committed to managing resources and conducting developments and operations in both an environmentally and fiscally responsible manner. The Port has also built a strong reputation for its progressive security measures and community engagement. For the last decade, the Port has also been at the forefront of revitalization of the LA Waterfront, improving public access to the water, developing public-friendly amenities and infrastructure, and transforming the harbor shoreline into a world-class visitor destination.
