**LIQUID (NOT GEL) HAND SANITIZER AVAILABLE FOR DONATION FROM ExxonMobil in Baton Rouge**

- ExxonMobil is making medical-grade hand sanitizer at its Baton Rouge Chemical Plant, which has the world's single largest unit producing isopropyl alcohol.
  - Produced under [FDA guidance](#) (IPA-based)
  - This is not a gel-type hand sanitizer – it has the consistency of water
  - The hand sanitizer is appropriate for first responders, medical professionals, etc.
- We are working to understand needs from organizations in the US
  - Communicate donation request to Brian Carroll (fill out the table below and send to [brian.p.carroll@exxonmobil.com](mailto:brian.p.carroll@exxonmobil.com))
  - Donation requests will be reviewed and those that are approved will receive further contact regarding pickup or shipping (preference is for pickup in Baton Rouge)
- \*Available in 3 packaging types with a preference for larger containers
  - IBC (intermediate bulk container): ~320 gallons per IBC (this is the preferred packaging method)
  - Pallet of 5-gal pails (48 pails per pallet)
  - Box of 1-quart bottles (12 bottles per box)
