Round Two Piece Celluloid Lock Pin Button (1")

Item # B199

[Share](#) [Print](#) [Email](#)

Some people call them the "old fashioned button" but the only difference between a one and two piece button is that there is an extra piece of metal in the two piece button between the back and the graphic. This makes the two piece button heavier and sturdier. Some people prefer one over the other, but both are quality buttons. Complies with Prop 65. 1" Diameter
