Discover a career at NIH:
It's about life

*The NIH is the center of medical and behavioral research for the Nation
---making essential medical discoveries that improve health and save lives.*

**Deputy Director, National Institute on Minority Health and Health Disparities
National Institutes of Health
Department of Health and Human Services**

Do you have a vision for the future of improving minority health and health disparities? Are you a first-rate Scientific Leader seeking a career at one of the preeminent biomedical research institutes in the nation and the world? The Deputy Director, National Institute on Minority Health and Health Disparities works closely with the Director to provide a national focus for the Federal effort to advance knowledge and understanding of mechanisms to improve minority health, identify and understand health disparities and develop effective interventions to reduce these disparities in community and clinical settings.

We are looking for applicants with a commitment to scientific excellence and the energy, enthusiasm, and innovative thinking necessary to lead within a dynamic and diverse organization. Applicants must possess an M.D., Ph.D., or equivalent doctoral degree in the biomedical sciences and have senior-level research experience and knowledge of research programs in one or more scientific areas related to minority health and health disparities. For the full list of qualifications, please see the announcement located at <http://www.jobs.nih.gov/vacancies/executive.htm>.

The successful candidate for this position will be appointed at a salary commensurate with experience and accomplishments, and full

Federal benefits, including leave, health and life insurance, retirement and savings plan (401K equivalent) will be provided.

If you are ready for an exciting leadership opportunity, please see the detailed vacancy announcement at
<http://www.jobs.nih.gov/vacancies/executive.htm>

Applications are due by 11:59 p.m., ET, on Thursday, March 28, 2019.
Please contact Lynnita Spears at SeniorRe@od.nih.gov for questions and/or additional information.

DHHS AND NIH ARE EQUAL OPPORTUNITY EMPLOYERS

The Lincoln Hospital Medical Center is seeking a full time neurologist. The position includes a combination of outpatient and inpatient consultation in general neurology, supervision and teaching of internal medicine and psychiatry residents and medical students. Administrative and clinical research opportunities exist, in accordance with the person's interest. Spanish proficiency is sought since the majority of the patients speak only Spanish. Required qualifications: board certification or eligibility in Neurology, NYS license. If interested please contact Dr. David Sternman, section chief of Neurology, david.sternman@nycchhc.org, (718) 579-5000 x 3325 (desk) or (917) 414-0227 (mobile).

Professor of Medicine and Chief of the Division of Cardiovascular Medicine at Brigham and Women's Hospital

Brigham and Women's Hospital is seeking a distinguished physician-scientist to serve as Chief and Senior Physician in the Division of Cardiovascular Medicine in the Department of Medicine at Brigham and Women's Hospital and holds an academic appointment as Professor of Medicine at Harvard Medical School.

Applicants should have a proven record of research accomplishments, sufficient training, and experience in internal medicine and the subspecialty of cardiology to be able to direct the clinical programs of the Division and have a thoughtful focus on educational and community interests. This individual will have far-reaching leadership responsibilities; therefore, he or she must have exemplary administrative, mentoring, and communication acumen not only to lead a large and complex division, but also to engage with institutional, departmental, and divisional leaders, the pan-Harvard community as well as the regional, national, and international cardiovascular community.

Prospective applicants should send a letter of interest, and a current curriculum vitae addressed to Ellen Seely, M.D., Chairperson, Ad Hoc Search Committee, Brigham and Women's Hospital, Inc., Department of Medicine, and email those to Jeannette Lane at jlane@bwh.harvard.edu.

Diversity Center of Excellence of the Cornell Center for Health Equity

Weill Cornell Medicine (WCM) and the Cornell Center for Health Equity are delighted to announce a grant award of \$2.7 million over four years to establish a Weill Cornell Medicine Diversity Center of Excellence under the direction of Principal Investigator Dr. Susana R. Morales and Co-Principal Investigator Dr. Monika Safford. This grant funding will come from the Centers of Excellence program of the Bureau of Health Professions of the United States Department of Health and Human Services Health Resources and Services Administration (HRSA).

“The WCM Medicine Diversity Center of Excellence award will allow us to expand our diversity and health equity efforts to better serve the diverse communities of New York City, the nation and the world. We are incredibly excited about this wonderful award,” said Dr. Morales, an Associate Professor of Clinical Medicine in the Division of General Medicine and Associate Attending at New York Presbyterian. “The Diversity Center of Excellence is a crucial piece of our Cornell Center for Health Equity strategic plan,” said Dr. Safford, the John J. Kuiper Professor of Medicine and Chief, Division of General Medicine at Weill Cornell and New York Presbyterian and Director of the Cornell Center for Health Equity, Weill Cornell campus.

The Cornell Center for Health Equity was launched in 2018. Through partnerships with communities, the Cornell Center for Health Equity will generate new evidence and design programs in research, education, and advocacy with the goal of achieving health equity for people locally, regionally and nationally. Targeted efforts of the Diversity Center of Excellence will include expanded pipeline programs for underrepresented minority (URM) premedical students, support and mentoring for URM medical students, trainees and faculty, expanded community based primary care and cultural competence education and research training in health equity. The Center of Excellence will collaborate with partners across Weill Cornell Medicine, New York Presbyterian Hospital, the hospital network, local colleges and universities, and community based organizations and government agencies. In addition to Drs. Morales and Safford, key faculty include Dr. Erica Phillips, Dr. Martin Shapiro, and faculty across Weill Cornell.

Although there have been improvements in the health status of the American people, racial, ethnic and socioeconomic health disparities in disease, death and disability persist. At a time when the nation’s population is becoming more diverse, its healthcare workforce has not kept pace, and underrepresented minority (URM) representation in medical education and the physician workforce do not reflect our diversity. Health workforce diversity has been linked to improved health care delivery, increased cultural competence and increased patient satisfaction. A significant increase in a diverse and culturally competent health professions workforce will contribute to effectively addressing the healthcare needs of URM populations.

Established in 1991, HRSA’s Centers of Excellence program award recipients serve as innovative resource and education centers to recruit, train, and retain URM students and faculty at health professions schools. Weill Cornell joins 18 other currently funded COE programs, including Tuskegee, Howard, UC Berkeley, UCSD, UCSF, Stanford, U Hawaii, Xavier, U of Puerto Rico, Michigan State, Rutgers, Oregon Health and Science, Geisinger, Meharry, UT San Antonio, Texas A and M, and Baylor. Programs work to improve information resources, clinical education, curricula, and cultural competence, and research as they relate to minority health and social determinants of health. The ultimate goal of the Centers of Excellence program is to strengthen our national capacity to produce a quality healthcare workforce whose diversity is representative of the U.S. population. They are seeking a [Diversity Programs Coordinator](#) to assist in administering this program.

Executive Search Announcement

The Kaiser Permanente School of Medicine has initiated a nationwide search for an accomplished and innovative academic executive to serve as its Founding Associate Dean, Admissions. This is an extraordinary opportunity for a leader in medical education to serve in a key leadership role in a unique, new medical school designed to offer much more than a conventional medical education. Scheduled to open its doors to its first class of students in 2020 in Pasadena, CA, the KPSOM is committed to building a leadership team as notable for diversity as it is remarkable for experience and talent. We are writing to you as a leader in academic medicine to request your nominations for this role and to obtain your assistance in communicating this exciting opportunity to highly qualified individuals. KPSOM's Founding Dean, Mark A. Schuster MD, PhD, is calling on visionary leaders and experts in medical education to help shape the future of medical education and healthcare in the nation. Self-nominations are welcomed.

The Associate Dean, Admissions leads and manages all aspects of the KPSOM admissions process, from initial outreach to matriculation. Specifically, the Associate Dean directs the design, implementation, and maintenance of all programs, policies, and systems that support student admissions. He/She also oversees the human resources, administrative, and logistical support for the Office of Admissions and works alongside the Dean in strategic planning, program development, and outreach. The Associate Dean cultivates and works with relevant pipeline programs and community partners to encourage an outstanding, diverse applicant pool and student body, and ensures that the admissions process is equitable and inclusive. He/She leads efforts and collaborates with the rest of the KPSOM team to actively recruit potential applicants, and explores innovative approaches for reviewing applications and accepting students.

The Associate Dean, Admissions partners with the Senior Associate Dean, Student Affairs and the Associate Dean, Equity & Inclusion to manage student services for prospective and enrolled students, to meet expectations for co-curricular review and assessment of services, and to ensure that objectives for student support and diversity, inclusion, and equity are accomplished in accordance with established priorities and goals. He/She organizes faculty to participate in admissions and recruitment processes.

The Associate Dean, Admissions will serve as an integral member of the Founding Dean's leadership team and will work closely with the team to develop the strategic and tactical plans for implementation of the KPSOM, including designing a unique curriculum and supporting recruitment of an exceptionally diverse student body equipped to benefit from the novel educational experience of KPSOM. The School of Medicine's goal is to prepare a new generation of physicians to influence positive change within the nation's health care systems by offering its students the unique opportunity to have access to the people, data, and technology of Kaiser Permanente, one of the nation's highest-performing healthcare systems, integrated into their education.

The KPSOM will not only provide a future-facing education but also hands-on experience, advanced team training and critically relevant knowledge that comes directly from the care delivery system. The faculty of the KPSOM will teach advanced skills in decision-making, teamwork, the use of technology, evidence-based medicine, and communication tailored to specific populations. In addition, the School of Medicine's curriculum will address prevention, wellness, and resilience for the total health of patients, communities, and physicians themselves. This unparalleled approach, plus a deep commitment to inclusion, will create physicians who are better prepared to face the medical challenges of the future and help our nation's diverse communities thrive.

The successful candidate will be an exceptional educator and academic administrator with the proven skills and values needed to contribute importantly to the development of a unique educational enterprise with extraordinary clinical and research partnerships. He/She will be a creative thinker who understands the current state of medical education and appreciates the need to transform it to meet the needs of today's patients, students, faculty and community of physicians/providers.

The Academic Health Center Practice of Korn Ferry is assisting the KPSOM with this important search. Please forward, as soon as possible, your nominations of highly qualified candidates to josh.ward@kornferry.com. Self-nominations are welcomed.

Senior Medical Director Network Primary Care

Phenomenal opportunity to lead a thriving and growing 100+ physician primary care network, as part of the Mount Sinai Health System. As an integral member of one of the largest and most distinguished health systems in the country, this leadership position will have a major impact on the care New Yorkers receive, spanning all 5 boroughs as well as in Westchester County and Long Island. With healthcare models undergoing rapid transformation, Mount Sinai has taken the lead among New York academic health systems in embracing value-based care and innovative ambulatory models. We are looking for a charismatic and dynamic physician leader to support clinical excellence in our Network practices throughout the metropolitan region, driving clinical transformation, innovation, exceptional quality outcomes, and patient satisfaction across more than 30 ambulatory sites.

The ideal candidate will have significant experience (5+ years) in leading large primary care practices and a track record of success meeting or exceeding quality metrics, clinical documentation, practice efficiency, financial performance, and clinical integration goals. Given the increasing focus on population health, leadership experience in ACO or value-based contracts is preferred.

Summary:

The Senior Network Medical Director for Primary Care is responsible for working with practice physicians, practice management, and Network leadership to support the development of the highest quality, integrated primary care platform. The Senior Medical Director (SMD) will promote the recruitment of high-quality primary care physicians, including the alignment and acquisition of existing practices as well as the recruitment of new PCPs.

In addition, the SMD will provide the necessary leadership to support practice transformation so that each primary care site meets its targets regarding quality metrics, clinical documentation, practice efficiency, financial performance, and clinical integration. As Mount Sinai evolves its healthcare model in a changing reimbursement environment, the SMD will play a lead role in preparing the practice and its clinicians for value-based care and will utilize his/her leadership to positively impact change management. To meet these goals, the SMD is expected to serve as the senior primary care physician, provide clinical supervision for practice physicians, identify clinical needs, promote adherence to Health System protocols, processes, and best practices, support practice growth and recruitment, strategy for population health, and serve as a liaison with Network and Health System leadership. The SMD will lead by example, bringing out the best in his/her colleagues.

Requirements:

- The physician must be board-certified and in good standing with a minimum of 5 years clinical experience and at least 5 years of demonstrated administrative and leadership responsibilities
- Must actively see patients as part of Network practice
- Must attend management training sessions as directed by Health System and Network leadership
- In addition, must participate in practice management modules as part of CME requirement
- Matrix relationship with Population Health, FPA, and Dept of Medicine
- Reports directly to CMO of the Mount Sinai Health Network and the President of the Mount Sinai Health Network

Key Responsibilities:

Strategic Leadership

- Develops primary care strategic recommendations on a yearly basis, in partnership with practice and

- Network leadership, taking into account opportunities for additional providers, expected physician turnover, local healthcare market, space needs, etc.
- Reviews strategic plan with Health Network leadership and works with Network leadership to modify recommendations and develop an implementation plan

Physician Staffing, Recruitment, and Retention

- Supports, in partnership with Practice Leadership and Network resources, primary care recruitment and appointment processes, including early position identification, development and posting of job descriptions, review of CVs, managing interviews, and working with Network leadership on finalizing appointment.

Education Activities

- Develops and coordinates regular primary care CME and non-CME educational activities for Network physicians
- Brings in MSHS physician experts for educational sessions and clinical practice updates
- Alerts practice clinicians to educational opportunities at MSHS
- As appropriate coordinates teaching activities for any rotating med students, residents, or fellows

Clinical Leadership

- Schedules regular practice meetings with site medical directors and Network PCPs on at least a bi-weekly basis
- Leads by example, set high personal and professional standards, serves as a positive change agent, and brings out best in colleagues,
- Works with System and Network leadership to ensure that the Network primary care practice meets the quality and performance standards set for the Health System.
- Supports site medical directors in implementation and performance of key quality metrics identified by the Health System Leadership
- Works with practices and primary care physicians to align with new compensation models
- Supports strategic imperatives for care coordination, including the use of in-network providers
- Addresses and escalates quality issues as needed
- Partners with Site Leadership to develop ongoing site-based Quality Improvement initiatives
- Regularly visits practices and physicians that represent new alignment opportunities

About Mount Sinai:

The Mount Sinai Health System is New York City's largest integrated delivery system encompassing seven hospital campuses, a leading medical school, and a vast network of ambulatory practices throughout the greater New York region. Mount Sinai's vision is to produce the safest care, the highest quality, the highest satisfaction, the best access and the best value of any health system in the nation.

The System includes approximately 7,100 primary and specialty care physicians; 10 joint-venture ambulatory surgery centers; more than 140 ambulatory practices throughout the five boroughs of New York City, Westchester, Long Island, and Florida; and 31 affiliated community health centers. Physicians are affiliated with the renowned Icahn School of Medicine at Mount Sinai, which is ranked among the highest in the nation in National Institutes of Health funding per investigator. The Mount Sinai Hospital is ranked as one of the nation's top 20 hospitals in Cardiology/Heart Surgery, Diabetes/Endocrinology, Gastroenterology/GI Surgery, Geriatrics, Nephrology, and Neurology/Neurosurgery, and is in the top 50 in four other specialties in the 2017-2018 "Best Hospitals" issue of U.S. News & World Report. Mount Sinai's Kravis Children's Hospital also is

ranked in seven out of ten pediatric specialties by U.S. News & World Report. The New York Eye and Ear Infirmary of Mount Sinai is ranked 12th nationally for Ophthalmology, while Mount Sinai Beth Israel, Mount Sinai St. Luke's and Mount Sinai West are ranked regionally.

The Mount Sinai Health System is an equal opportunity employer. We promote recognition and respect for individual and cultural differences, and we work to make our employees feel valued and appreciated, whatever their race, gender, background, or sexual orientation.
