Division/Work Unit: Office of the Commissioner

Business Title: Senior Science Advisor

Civil Service Title: City Research Scientist – Level IV-B

JOB ID#: 405051

Job Summary

The New York City Department of Health and Mental Hygiene is a world-renowned agency with a long tradition of protecting and promoting health in the nation's most culturally and linguistically diverse city. Our 6,500-plus team members bring an extraordinary array of languages, cultures and experiences to bear on the work of public health. Our diversity fuels creativity, because all perspectives are heard and valued.

The Office of the Commissioner oversees the Health Department's strategic public health planning efforts, initiatives, policies and program development in support of protecting and promoting the health and safety of New Yorkers.

Reporting directly to the Commissioner of Health, the Senior Science Advisor will work to align public health goals with agency policies, programs, and operations through the assessment of relevant scientific materials in a timely manner. They will advise on various emerging public health issues to inform program and policy decisions, which involves gathering, analyzing, and summarizing key scientific and public health literature and soliciting expert opinion. The Advisor will help facilitate the ability of DOHMH to monitor and continuously improve upon various processes, activities and outcomes in order to ensure a healthier New York.

Job Description

- Review policy, programmatic and scientific issues as needed and make recommendations concerning current and future program and policy planning to the Commissioner;
- Review scientific literature, manuscripts and clinical studies as requested by the Commissioner to assess evidence, validity and reliability in order to provide assessments as to whether materials are consistent with agency goals;
- Provide critical analysis of literature that relates to measurement and tracking of disparities, evidence-based approaches to promoting health equity;
- Summarize strategic approaches to realize agency commitment to disparities reduction;
- Draft commentary/review letters and articles for publication in peer-reviewed literature;
- Participate in compilation and statistical analysis of Agency data;
- Collaborate with Agency leaders to develop, review, and evaluate public health policies; and
- Work with partners to design and implement complex public health projects; and
- Participate in special projects and workgroups as assigned.

Preferred Skills

- Master of Public Health (MPH) required unless a candidate has an MD and relevant clinical experience. Greater consideration will be given to candidates with both an MPH and a doctorate degree from an accredited college or university;
- Demonstrated experience in multiple public health policy and clinical areas, including chronic disease prevention, maternal child health and or health systems management;
- Demonstrated experience researching, writing and reviewing scientific literature, manuscripts, clinical data and other materials;
- Excellent communications and research skills are a must;
- Ability to build and maintain effective working relationships across programs and with outside agencies; and
- Attention to detail and excellent organizational skills are a must

Family Medicine Physicians - Have Time for it ALL...Your Patients and Your Lifestyle

Join our progressive healthcare team at our Clinic in San Diego

How would you like to...

Be part of a patient-centric healthcare team focused on health improvement rather than volume?

Have your nights and weekends free to spend engaged with those that mean the most to you like family and friends?

Be free of the hassles of billing and coding?

THE JOY OF PRACTICING PERSON-CENTERED PRIMARY CARE

Our client, Activate Healthcare, allows you to practice medicine the way you were trained, applying an integrated, whole-person approach centered on the physician-patient relationship.

- Time you need to actually care for your patients
 - No administrative hassles; no tedious paperwork in the evenings
 - Care that is centered on your patient, not on RVUs
 - A patient panel comprised of 66% to 75% fewer patients than typically in fee-for-service care
 - A schedule that averages 15 to 18 appointments per day, allows time for patient education and dialogue with patients to identify underlying health issues
 - On-time patient appointments and scheduling flexibility
 - This is an employer-based clinic, your non-compete agreement will not likely be an issue

Make a difference Activate Healthcare is transforming health care by motivating and supporting their patients and their families to take charge of their health, enabling their employers to better manage their health care costs. Activate Healthcare's PCPs practice at the leading edge of a transformation to evidence-based, physician-patient relationship-focused, advanced primary care.

Don't Wait- call, text, or email me today!!

Bob Bregant, President, Steele Healthcare Solutions

The LSU Health Sciences Center in Shreveport, along with Ochsner LSU Health System Shreveport, seeks a Chair of the Department of Pediatrics. The new chair will provide leadership to the department with the development and implementation of a dynamic vision for its future, while also working with the Dean and other Department Chairs in the ongoing evolution and success of the School. Under the leadership of Chancellor G.E. Ghali, DDS, MD, FACS, FRCS(Ed), the Chair will build on an excellent foundation of over 50 full- and part-time faculty and work collaboratively with other departments.

The University's primary teaching hospital, Ochsner LSU Health System-Shreveport, serves as a tertiary care referral center and regional trauma center for North Louisiana, East Texas and South Arkansas. The Department also works closely with the local *Shiners Hospital for Children*. Overall, the combined facilities provide extensive experience in outpatient and inpatient care, including well-child care, acute care, and pediatric subspecialty care.

Highlights include:

- **Level 3 Neonatal Intensive Care Unit** – 40 bed unit
- **23 pediatric beds** in patient ward and an **8-bed pediatric intensive care unit**
- One of 8 Children's Hospitals in the country **affiliated with *St. Jude Children's Research Hospital***
- **14 Full-Time and 7 Part-Time General Pediatricians**
- **21 Full-Time Subspecialists**, including Allergy/Immunology, Cardiology, Child Abuse, Critical Care, Endocrinology, Hematology/Oncology, Infectious Disease, Neonatology, Nephrology, Neurology, Pulmonology & Rheumatology
- Pediatric specialists in ENT, OMFS, Ophthalmology & Surgery
- **3 PhDs and 2 non-MD Instructors**
- **Over \$2 million in research grants**
- **Children's Clinical Research Center** with a dedicated 3-bed clinical trial unit and laboratory, which supports 10-12 NIH and Pharma-sponsored clinical trials annually. Inpatient and outpatient subjects.
- **Pediatric residency training program with 24 residents** (8 per year)
- **Med/Peds residency training program with 16 residents** (4 per year)
- Our health sciences center is home to the School of Medicine, School of Graduate Studies and School of Allied Health Professions.

The primary objectives of the Department of Pediatrics are:

- High quality care
- Progressive resident development in clinical and research skills
- An environment that challenges students, residents, and faculty alike, while providing maximum opportunity for development.

We are seeking a candidate with a compelling vision for the future of pediatric healthcare, education and research with excellent management and business skills to maximize the strengths of LSU School of Medicine and Ochsner LSU Health System Shreveport and drive the department forward. Candidates must have a distinguished record in Pediatrics and outstanding clinical skills. The candidate must qualify for the rank of Professor of Pediatrics and be eligible for a Louisiana Medical License.

Interested candidates may email their curriculum vitae to: ShvFacultyRecruitment@lsuhsc.edu

Review of applicants will begin immediately and will continue until the position is filled.

LSU Health Shreveport is committed to diversity and is an equal opportunity / equal access employer.

The Caring Place
Where the patient is at the
center of everything we do.

Looking for an OB/GYN Generalist and Certified Midwife to Practice Community Health in the Bronx, NY

Morris Heights Health Center is a leading nonprofit provider of integrated health care for New Yorkers. We have a great opportunity in our Federally Qualified Health Center (FQHC) for an Ob/Gyn generalist to join our expanding women's health practice committed to delivering top quality patient care in a culturally competent manner.

This busy practice currently consists of two highly trained Board Certified OB/GYN Physicians and five Certified Nurse Midwives with extensive community health experience. There is a balanced mix of OB and GYN patients with the opportunity to perform office gynecological procedures.

NYS license and certification is required. Spanish speaking skills are a plus. This job is purely ambulatory and there is no on-call required. One Saturday per month is a requirement. The schedule is Flexible.

Hone your skills and practice with supportive professionals in an organization known for excellence and leadership in integrated care. Competitive compensation, excellent benefits, retirement plan, plus separate pension plan, full malpractice, loan forgiveness, one week for CME plus 4 weeks of vacation. Great opportunity to work in culturally diverse Bronx with easy access to all New York City has to offer. Close to public transportation. Parking is also available for those who drive!

Please Contact Dr. Tammy Rosado Gruenberg at tgruenberg@mhhc.org or at Tel: 718-483-1270 ext. 3204.

PennState Health
Milton S. Hershey Medical Center

The Penn State Health Milton S. Hershey Medical Center Department of Psychiatry is currently recruiting board eligible/certified psychiatrists for inpatient and outpatient positions in both adult and child psychiatry.

We are a growing, vibrant department in a strong academic medical center. We host specialty clinical and research programs, including research that crosses the translational spectrum. Our educational programs include adult psychiatry residency, child fellowship, psychology internship, externship and post-doctoral fellows. We have a strong collaboration with basic and clinical science in other neuroscience disciplines across several Penn State campuses.

With our clinical partner, the Pennsylvania Psychiatric Institute, the Department staffs several outpatient and partial hospital programs for children and adults, 89 inpatient beds, ECT and other neuromodulation services, specialty sleep and eating-disorders programs, and expanding psychiatric consultation and integrated care programs for **Hershey Medical Center**.

For consideration, send your CV to:

Jenna Spangler, Physician Recruiter

Phone: 717-531-4271

Email: jspangler2@pennstatehealth.psu.edu

The Penn State Health Milton S. Hershey Medical Center is committed to affirmative action, equal opportunity and the diversity of its workforce. Equal Opportunity Employer – M/W/V/D

Director of Adult Outpatient Psychiatry Services
Cambridge Health Alliance
Make a Difference! Drive the Development of Innovative Practice!

Cambridge Health Alliance (CHA), a nationally recognized and award-winning safety net healthcare system, with a major psychiatric component, and deep commitment to mission, is recruiting for **Director of Adult Outpatient Psychiatry Services**. The CHA Department of Psychiatry is known nationally in its own right as a leader in innovative, comprehensive patient-centered care, multi-faceted teaching and training, and practice-based research. Adult outpatient services are multi-site and include teams organized around special capabilities, including cultural and linguistic capacity, substance abuse, trauma, and geriatrics. The outpatient services interface with extensive CHA primary care services and operate in the context of relevant accountable care organizations.

We are looking for an accomplished, energetic leader to drive and oversee the continuing transformative development of adult outpatient psychiatry. The Director will function as a key member of the dynamic senior leadership team of the Psychiatry Department, taking part in developing and implementing innovative strategies to meet patient and population needs, in the context of patient-centered and measurement-based care.

As a major teaching affiliate of Harvard Medical School (HMS); an academic appointment is available commensurate with medical school criteria.

CHA offers competitive compensation and a comprehensive benefits package including health and dental insurance, 403b retirement accounts with matching, generous PTO, CME allotment (time and dollars) and much more.

Qualified candidates will be board certified in psychiatry, licensed in clinical psychology, or licensed in social work as an LICSW. Limited clinical practice time will be required as part of the position. Candidates should have a strong track record of leadership and accomplishments, and possess a deep commitment to serving our diverse patient population, and addressing problems of access and health disparities.

Submit CVs to Melissa Kelley at ProviderRecruitment@challiance.org or visit our website www.CHAproviders.org. CHA Provider Recruitment Department can be reached by phone at (617) 665-3555 or by fax at (617) 665-3553.

In keeping with federal, state and local laws, Cambridge Health Alliance (CHA) policy forbids employees and associates to discriminate against anyone based on race, religion, color, gender, age, marital status, national origin, sexual orientation, relationship identity or relationship structure, gender identity or expression, veteran status, disability or any other characteristic protected by law. We are committed to establishing and maintaining a workplace free of discrimination. We are fully committed to equal employment opportunity. We will not tolerate unlawful discrimination in the recruitment, hiring, termination, promotion, salary treatment or any other condition of employment or career development. Furthermore, we will not tolerate the use of discriminatory slurs, or other remarks, jokes or conduct, that in the judgment of CHA, encourage or permit an offensive or hostile work environment.

*People are the
source of our
strength.*

At OhioHealth, diversity and inclusion are embedded in our culture and our mission: **To improve the health of those we serve.**

Because we believe when OhioHealth reflects the diversity of our communities in who we work with, who we hire and who we serve, we all succeed.

Now hiring in all specialties.

Bring your perspective
to OhioHealth. Visit

Join the Winthrop P. Rockefeller team and help us fight the battle against cancer

The Winthrop P. Rockefeller Cancer Institute and the University of Arkansas for Medical Sciences Hematology/Oncology Division seeks medical oncologists interested in joining its exemplary team of Cancer Institute and Cancer Network physicians and physician scientists. All applications will be considered, but priority will be given to those applicants with an interest in breast, thoracic, myeloma and GI/GU oncology. Interest in clinical trials and translational research is preferred. Recruitment is for tenured and tenure-track clinical faculty at all ranks and includes academic appointment in the Hematology/Oncology Division. Applicants must be board certified or board eligible in hematology/oncology and be eligible for licensure with the Arkansas State Medical Board. A signing bonus will be provided. This recruiting effort is made possible through significant institutional support and a \$10M annual commitment from the state of Arkansas to support the Cancer Institute's efforts to attain NCI Designation.

Successful applicants will join one of the most prestigious cancer centers in the country. The Winthrop P. Rockefeller Cancer Institute has been one of the nation's premier cancer centers for more than three decades, and it is the only cancer center in the state of Arkansas with a robust cancer research portfolio and a mission to improve cancer outcomes for all Arkansans. The Cancer Institute treats over 2,500 new cancer patients annually and has an extensive effort focused on delivering cancer care and conducting research in underserved populations. Its 135 members conduct outstanding cancer research in multiple scientific programs. Cancer Institute members receive approximately \$10 million in extramural cancer research funds annually, including multiple "team science" grants. The Cancer Institute has 5 institutional shared resource facilities. A robust clinical trial infrastructure currently supports nearly 270 cancer clinical trials. The University of Arkansas for Medical Sciences is one of 57 institutions with an NIH Clinical and Translational Science Award, which supports translational research and creates a supportive environment that synergizes with the Cancer Institute to promote junior investigators and transdisciplinary research.

Applicants should send their Curriculum Vitae, a one page letter of interest, and 3 professional references directly to Jennifer Moulton at jamoulton@uams.edu. Application deadline is February 1, 2021. Review of applications will continue until all positions are filled. Applicants must have an MD, MD/PhD or equivalent. Selected applicants will join a diverse and vibrant academic community that values its researchers and is committed to diversity, equity and inclusion. Applicants must be able to work in a team environment.

UAMS is an inclusive Affirmative Action and Equal Opportunity Employer of individuals with disabilities and protected veterans and is committed to excellence.

**Pediatric Pulmonology Faculty Position
Department of Pediatrics
Division of Pediatric Pulmonology
University of Michigan Medical School**

The Division of Pediatric Pulmonology at the University of Michigan in Ann Arbor, MI is recruiting a full-time Clinical Instructor or Clinical Assistant Professor of Pediatric Pulmonology with strong clinical and teaching skills. The rank of the selected candidate will depend upon candidate's qualifications. Candidates must be BC/BE in Pediatric Pulmonology.

The Division of Pediatric Pulmonology is currently comprised of ten board-certified pediatric pulmonologists (one of whom who is also board-certified in sleep) and four nurse practitioners. The Division provides inpatient care for children at C.S. Mott Children's Hospital in Ann Arbor. In addition to caring for patients on the pediatric pulmonary service, the Division provides care for a 10-bed Pediatric Ventilator Unit for patients requiring long term ventilation, and an active consult service that sees patients in the pediatric and neonatal intensive care units, pediatric cardiothoracic unit, subspecialty services and general pediatrics service.

The Division is also responsible for a busy outpatient practice that cares for patients with asthma, cystic fibrosis, BPD, chronic respiratory failure, primary ciliary dyskinesia, congenital lung abnormalities, neuromuscular and aerodigestive disorders, interstitial lung disease and other pulmonary illnesses. Worthy of special mention are the Cystic Fibrosis Center, which cares for 263 children, the Home Ventilator Program, which cares for 213 patients receiving technology-assisted home care, and the Pediatric Asthma Wellness Program. In addition, we have a state-of-the-art pulmonary function laboratory, a full sleep lab and a very active bronchoscopy service. The Division staffs Michigan Medicine clinics in Ann Arbor, Northville, Brighton, Ypsilanti, and Mt. Pleasant. Candidates will be expected to participate in clinical care, teaching of medical students, residents and three Pediatric Pulmonology fellows and quality improvement. Participation in research, including CF and asthma clinical trials, is also supported. Pediatric pulmonologists with experience in sleep disorders are encouraged to apply.

Interested candidates please direct a CV to: Carey Lumeng, M.D. Ph.D., Department of Pediatrics, Interim Director, Division of Pediatric Pulmonology, University of Michigan Medical School, L2221 UH South, 1150 W. Medical Center Drive, Ann Arbor, MI 48109-5688, Phone: 734-615-6242; Fax: 734-764-3200; e-mail clumeng@umich.edu.

The University of Michigan is an Equal Employment Opportunity/Affirmative Action Employer

Fully-Funded Research Opportunity
Cardiothoracic Surgery Research Laboratory
Washington University in St Louis School of Medicine

The Division of Cardiothoracic Surgery at Washington University offers a unique training opportunity for graduated medical students, surgical residents, and postdoctoral fellows interested in Cardiac and Thoracic Surgery research. Dr. James L. Cox established the division's research laboratory in 1983, and since then we have trained 114 surgeon-scientists from around the world. This laboratory is led by well-established, world-renowned investigators researching a wide range of clinical and basic scientific problems that originate in cardiac and thoracic surgery. These include: Surgical Treatment and Mechanisms of Arrhythmias (Dr. Damiano); The Role of the Adaptive Immune System in Lung Allograft Rejection, The Role of Donor Innate Immune Responses in Regulating Alloimmunity after Heart Transplantation (Dr. Kreisel); Underlying Mechanism in the Development of Hypoplastic Left Heart Syndrome (Dr. Eghtesady) Inflammatory Mechanisms in Postoperative Atrial Fibrillation (Dr. Melby); Innate Immune Response in Lung Transplantation (Dr. Gelman); and patient outcomes research, Optimizing Donor Management in Lung Transplantation (Drs. Kozower and Puri). These projects are conducted in collaboration with faculty in Vascular Surgery, Public Health Sciences, Cardiology, Pulmonary Medicine, Radiology, Genetics, and Biomedical Engineering. These investigators are all well-funded and presently have over \$20 million of NIH funding and VA Merit Review grants. This position is supported by the division's NIH Institutional National Research Service award (T32). This training grant provides full salary support for qualified individuals for a two-year period beginning July 1, 2021.

Potential trainees must have an MD and be a US citizen or have a permanent resident card (green card). We are now accepting applications. Applicants should submit their curriculum vitae and two letters of reference to Dr. Christian Zemlin, Director of the Cardiothoracic Surgery Research Laboratory via email (zemlinc@wustl.edu; hornj@wustl.edu) (mailing address: Dr. Christian Zemlin; Cardiothoracic Surgery; Box 8234, 660 South Euclid; St. Louis, MO 63110) For more information or questions, contact 314-362-8300.

Washington University is committed to providing a diverse environment and encourages applications from women and under represented minorities.

Ophthalmology Career Development Opportunities with Genentech

Ophthalmology Research, Development and Diagnostics at Genentech

Since its foundation by the UCSF (University California San Francisco) biochemist Herb Boyer and venture capitalist Bob Swanson in 1976, Genentech has been on the forefront of biological medicines discovery. As the first biotechnology company, Genentech also discovered and developed ranibizumab (Lucentis), the first successful anti-VEGF intravitreal treatment for retinal diseases after Macugen. Since unveiling of the Lucentis results in neovascular age-related macular degeneration (nAMD) pivotal trials ANCHOR and MARINA in 2006, and through the subsequent Lucentis approvals for treatment of patients with retinal vein occlusions (RVO), diabetic macular edema (DME), diabetic retinopathy (DR), myopic choroidal neovascularization (mCNV) and pre-filled syringe delivery, Genentech continues to focus on saving people's eyesight from the leading causes of vision loss through pioneering therapies in development today.

The current efforts include development of the first bispecific antibody treatment for intraocular use, faricimab, which targets both simultaneously and independently Ang2 and VEGF, two molecules that are key in the pathophysiology of several retinal diseases, the novel port-delivery system for ranibizumab extends durability of ranibizumab efficacy in retina and eliminates the need for frequent patient office visits and injections. We are also actively researching novel treatments in dry AMD and geographic atrophy, glaucoma and dry eye. Among additional exciting research and development projects, Genentech is also pursuing gene therapy and other novel intraocular delivery approaches, and development of diagnostic and predictive tools involving A.I.

Today, Genentech Ophthalmology employs full-time hundreds of professionals devoted to ophthalmology research and development, including experienced MD ophthalmologists trained across a range of multiple ophthalmology subspecialties from retina to glaucoma and ocular immunology. Our Ophthalmology Internship, Fellowship and Visiting Professorship programs for undergraduates, MD, PharmD and PhD graduate students and early-career ophthalmology professionals are an integral component of the Genentech's mission in discovery and development of new medicines, delivery platforms and diagnostic tools in Ophthalmology.

Broad range of opportunities to suit your experience

Under- and New Graduates (PhD, PharmD, MD/PhD, MD/MBA)

Advance your scientific research capabilities by immersing in and learning about ophthalmology from a world-class clinical development team.

Experienced Post-Docs (PhD, PharmD, MD, MD/PhD, MD/MBA)

Build your scientific record and drug development acumen while gaining valuable industry experience in a supportive and cutting-edge biotech setting.

Practicing Ophthalmologists

Expand your scientific knowledge by participating in the design and development of novel therapies, personalized healthcare, and next-generation diagnostics.

Short-term Opportunities (1-6 months)

Clinical Development Summer Internship

For MD/PhD/PharmD students or undergrads on the MD/PhD/PharmD career path

Develop and present a scientific project while learning about future career opportunities

Length: 3 months

Location: South San Francisco (US)

Open Spots: 1-4 annually

Commercial Internship

For MBA or MD / MBA graduates

Work to help get our medicines to patients faster

Length: 6-12 months

Location: South San Francisco (US)

Open Spots: Up to 1 annually

Long-term Opportunities (6+ months)

Clinical Development Fellowship

For PhD or MD/PhD graduates

Gain hands-on experience in clinical drug development in

Early Research – focus on bench-top research

Late Stage – Focus on late development

Length: 1-2 years

Location: Basel (Switzerland), Welwyn (UK),

South San Francisco (US)

Open Spots: 1-4 annually

Clinical Development PharmD Fellowship – affiliated with Rutgers

For PharmD students and graduates

Contribute to clinical and scientific strategy supporting molecule development: design, execute, analyze, and interpret data from clinical development programs.

Length: 2 years

Location: South San Francisco (US)

Open Spots: 1 annually

Clinical Development and Personalized Healthcare Clinical Fellowship

For MD or MD/PhD graduates and early career professionals

Experience clinical drug development while continuing clinical practice

Length: 1-2 years

Location: Basel (Switzerland), Welwyn (UK), South San

Francisco (US)

Open Spots: 1-2 annually

Translational Medicine and Medical Affairs

Visiting Professorships (e.g. MD or MD/PhD)

Use your expertise to work on a highly impactful project in translational or clinical drug development and simultaneously learn about company opportunities

Length 3-12 months

Location: Basel (Switzerland)

Open Spots: 1 annually

Please contact Ophthalmology Medical Director, Zdenka Haskova, M.D. Ph.D. at haskovaz@gene.com or program coordinator, Cheryl How at cheryldho@gene.com for more information on any of these opportunities.

The Vertex Physician-Investigator Program

A unique opportunity to develop leaders of the future

Vertex: Our Background

At Vertex, we are relentless in the pursuit of transformative therapies. Bringing together the brightest minds, investing in science and taking smart risks, we strike at the core of serious diseases. Vertex invests in scientific innovation to create transformative medicines for people with serious diseases with a focus on specialty markets. Vertex is a global biotechnology company with research sites in Boston, San Diego, and Oxford, and the UK.

What is the Vertex Physician-Investigator Program?

The **Vertex Physician Investigator Program** offers exceptional early career physician investigators, with a broad variety of backgrounds and experiences, full-time employment commencing with a unique two-year, immersive experience in which they complete four customized rotations. The program intends to provide participants with a broad understanding of the drug development process and to enable future leadership opportunities. Our Chief Scientific Officer, David Altshuler, and Chief Medical Officer, Carmen Bozic, sponsor the program. Gary Meininger, SVP, Head of Clinical Development for Vertex Cell and Gene Therapy directs this program giving participants direct access to senior leadership at Vertex.

Please express your interest by January 15, 2021

Submit an application with your CV and a 1-page letter to

<https://bit.ly/3nu0zkj>

For more information please email VPI@vrtx.com

Why be a Vertex

Physician-Investigator?

Physician-investigators are critical to the successful development of new medicines. Our goal is to develop multiple career path options at Vertex for well-trained, new-to-industry physician investigators and to help further ensure the future success of Vertex Research and Development efforts.

What We Offer:

- Full-time employment with health and wellness benefits and a competitive compensation package
- Intensive didactic training throughout the program
- Opportunity to rotate through departments essential to our success and immerse into core projects
- Mentorship from senior leaders at Vertex
- Leadership development

Who is Eligible:

- Early career MD/PhDs or MDs with a proven research track record with expressed interest in biopharmaceutical research
- Less than 5 years since completion of training
- Evidence of scholarly distinction, investigative work
- Early career faculty looking to move to industry
