

Tempered glass helped this home survive the Palisades Fire.

Radiant heat from a burning hedge broke this window in the Camp Fire.

THE UC ANR FIRE NETWORK PRESENTS

FIRE SAFE SOLUTIONS FOR DESIGN, BUILDING, AND UPKEEP WEBINAR

We often equate reducing community risk of wildfire with hazardous fuels reduction. While that is one component, new research highlights the importance of home hardening and building design. **Join the UC ANR Fire Network to learn about simple, low-cost actions that you can do to protect your house and property.** This webinar is intended for all of California's homeowners, renters, and interested community members.

Presenter **Yana Valachovic**, a registered professional forester and scientist with the Fire Network, is a leader in developing and delivering local and state strategies to improve wildfire resilience. Yana will **share recent insights from the Los Angeles fires**, give an overview of issues regarding building design, insurance, best practices for homeowners, and strategies for community leaders.

DATE/TIME: MAY 5, 2025
FROM 6:30 - 7:30 PM PST

REGISTER FOR THIS FREE WEBINAR BY MAY 1, 2025!
