

Meet the MCW Civic Engagement Interest Group

The Civic Engagement Interest Group (CEIG) brings together graduate, pharmacy and medical students to educate and empower them to become advocates. Their events include presentations to all students to encourage early registration and preparation for elections, workshops to navigate WI legislation, a provider advocacy panel, and a weekly voter registration booth.

Come see them at the booth every Tuesday from 10am-2pm in the 3rd floor HUB!

Shawna Gloe
Co-president

Shawna became co-president of the CEIG in her search for like-minded peers who were interested in learning about the intersection of healthcare, politics and legislation. She hopes to inspire her peers to engage in discourse on issues they are passionate about.

Victoria Le
Co-president

Victoria found herself contemplating policy while working in an ER in her gap years. She saw the importance of physician advocacy for systemic change. She hopes to work to enact large-scale change that benefits the communities she will serve as a physician.

Scan below to join CEIG and get involved!

Volunteers needed to help MCW staff, students and faculty register for the upcoming election!

Clayton Vesperman
Community Outreach Chair

Clayton sees the civic engagement interest group as an opportunity to establish himself as a physician advocate early on in his training. He hopes to serve his community by inspiring others to participate in advocacy for policies that lead to more accessible and affordable healthcare.

Bridget Nelson
Pharmacy Co-Chair

While at Marquette, Bridget participated in healthcare legislative symposiums in D.C. to discuss pertinent healthcare related initiatives with WI senators and representatives. She feels healthcare advocacy efforts should address needs of professionals working in healthcare as well as the patients they serve.

Matt DeSchepper
Pharmacy Co-Chair

Matt joined the civic engagement interest group board in hopes of inspiring student pharmacists to see the importance of civic duty and legislation. With laws and legislation impacting the scope of pharmacist care, he hopes to see more conscious, deliberate pushes for positive change in healthcare legislation.
