SHOALS Marine Laboratory

Integrated Ecosystem Research & Management

DATES: July 15 – July 29, 2019

FACULTY:
Dr. Mike Sigler, Dr. Elizabeth Siddon, Dr. Chris Siddon, Dr. Jennifer Seavey

COURSE DESCRIPTION: This course will expose students to real world conservation and management problems occurring in the Gulf of Maine. Students will be challenged to consider human and ecological dimensions of specific natural resource management challenges and to make specific recommendations to managers that are working within the Gulf of Maine on issues related to seabird, fisheries and marine mammal management.

Work conducted during this project-based course may be equivalent as a capstone experience in your major. Confirm with your advisor.
