

The SCIC Dr. King's Dream Series presents:

# Building Community Power to Achieve Environmental Justice: Challenges & Opportunities

Sunday, July 25, 3:00pm - 5:00pm

Speaker:

**Alicia Rivera**

Communities for Better Environment (CBE)

*Wilmington Community Organizer*

Pollution affects everyone in California. Many live in smoggy areas like Los Angeles and Riverside where breathing the air can take as many as three years off a person's life. People of color—African-American, Latino, Filipino—are more likely to live near the huge facilities that spew toxic and greenhouse gases. And it's a fact—the lower your income, the more likely you are to live in an area with lots of local pollution. Join us on Zoom as we discuss this important topic and see what we as an interfaith community can do to make effective and positive change.
