

ALGEBRA CENTER

Mon - Thurs / 3:30 - 4pm
Rm 46 / just walk in

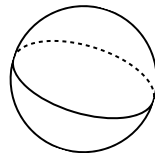

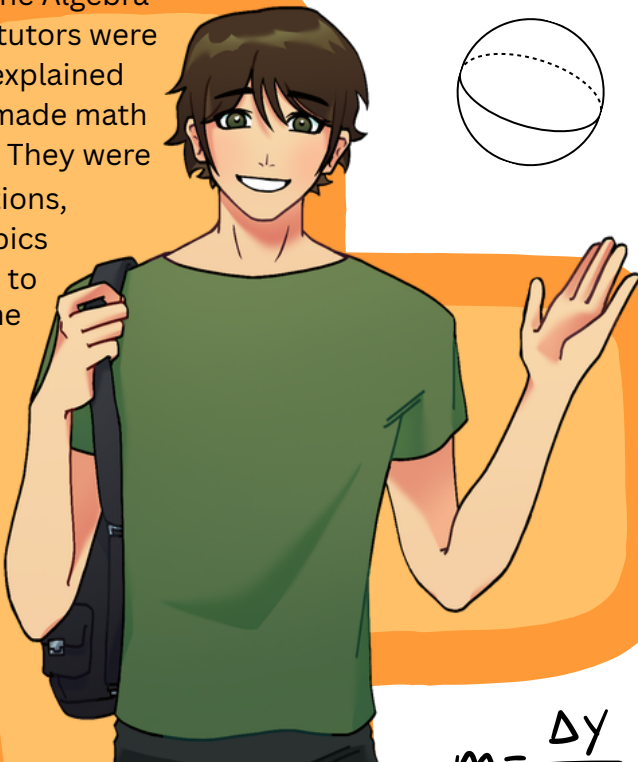

“After my experience going to Algebra Center, I noticed a huge change in the improvements of my grade and with understanding new math materials. I was able to get my grade up from a B- to a B+ with plenty of support and kind tutors there.

Going to Algebra Center with my friends made learning more enjoyable because we were able to help each other. I also built great connections with many tutors, which even made my experience better.”

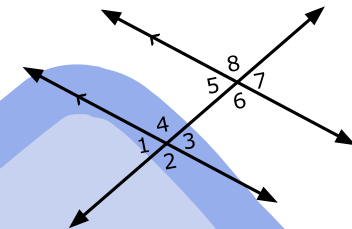

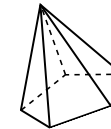

- Algebra 2 student, 5.10.26

“I really appreciated the Algebra Center this year. The tutors were super helpful and explained things in a way that made math easier to understand. They were patient when I had questions, and they made hard topics feel much easier. Going to Algebra Center helped me feel more confident in class, improve my problem-solving skills, and grow as a student overall.”

$$m = \frac{\Delta y}{\Delta x}$$

“Geometry Honors was definitely challenging for me, especially when we started learning more difficult concepts and proofs. Whenever I got stuck on homework problems or didn't fully understand a lesson, Algebra Center was a really helpful place to go. The tutors were always welcoming, patient, and willing to explain things in a way that actually made sense to me. Thanks to the support from the tutors, I was able to maintain an A in Geometry Honors throughout the year.”
