Are you interested in exploring the health sciences and looking for something to do this Summer? - HSIP is an accessible, enriching and fun option for you!

In Summer 2021, we will give high school students an introduction to the academic, research and professional components of the health sciences. A key focus of HSIP will be to help students consider their future college experience and careers. Over the last two years over 460 high school students in California and beyond have been introduced to the health sciences field through HSIP. During 2019 and Spring 2020, our first five sessions took place at Cal State LA and the USC Health Sciences campus. In 2020 and Spring 2021, over 340 students enrolled in the first six Zoom HSIP sessions. During Summer 2021, HSIP will take place online through Zoom, so we can continue to offer this immersive opportunity to high school students.

- Engage in lectures from 11+ Science Professors/ PhD Grad Students from institutions including UCLA and Cal State LA about their research as well as health professionals such as a doctor and dentist about their careers
- Prepare for college admissions in our counselor led workshop and engage in our career options and pathways workshops
- Work collaboratively on a small group research project to build science inquiry and public communication skills
- Be Part of Community That Values Learning and Mentorship!
