ABOUT THE CLASS... from Instructor Roxanne Kind

"This eight-week course will be as relaxed or as intense as the student wishes. Seasoned actors have the option to delve deeply into a character's psyche in creating a memorable character. First-time actors have the option to study the many different methods of developing a character and experimenting with what works best for them. Students will show off their skills in working a scene or monologue during the last day of class.

Although this is a distance learning course, scene partners will meet through Zoom and rehearse their parts as if they were in the same room.

Students will learn a little about the history of acting starting with the Greeks, pushing past Shakespeare, to today's modern, realistic style of acting. Proper breathing techniques, improvisation, the lexicon of the actor and relaxation techniques, as well as the importance of movement and scene design will also be explored."
