

***“We’re here to make the process simple and profitable.”***

## Title Agents Go Nationwide

For agents interested in growing their businesses by expanding into multiple states, we’re here to make the process simple and profitable. We offer you one point of contact to streamline your options and solutions.

In states where you are licensed to do business, we provide centralized underwriting support. In states where you are not licensed to do business, FNTG can help you get licensed or find the best solutions to meet your title insurance needs. The choice is yours. Regardless of what you decide, all of your requests will be handled through one point of contact for all of your needs, and enabling you to market your company as a national agency. We help you to compete on a level playing field with other national title agencies and underwriters.

We also offer customized agent work share agreements in states where you are not licensed to do business. This enables agents to participate in the process and obtain title commitments and policies for their customers through Fidelity National Agency Solutions®. We even offer customized Web site branding, so that when your customers log onto your FNAS Web site, they will see your company name, logo, colors and contact

information. Our goal is to create a seamless process for you and your customers.

If you are interested in growing in to a multi-state title agency or just have the occasional out of your home state deal you need help getting closed, I can help.
