

## Part of the 2021 Dietrich School "Science Revealed" Public Lecture Series

**Wednesday,  
June 2, 2021  
Noon - 1 p.m.**

**Free and  
open to the  
public.**

**Registration  
required by  
June 1.**

### **"Perspectives on Health: (In)Equity Across Communities"**

Amidst a global pandemic, the status of our mental and physical health has been brought to the forefront and highlighted the effects of stress on our well-being. The pandemic has also brought attention to the disparities in healthcare access across different populations.

Pitt alumnae and faculty members, Anna Marsland and Abimbola Fapohunda, will discuss the impact stress and other factors have on our susceptibility to viral infection and response to vaccination, and the importance of taking action to address the long-standing disparities in health equity worldwide and at home.

**This program is presented in partnership with the Pitt Alumni Association's Deliberative Dialogue Series.**
