

Colby-Sawyer College
Campus Compact EnviroCorps Presentation

Water Quality and Lake Health

Presented by

Beth Williams

AmeriCorps Member, Campus Compact EnviroCorps

Join us for a closer look at why water quality matters and how it affects both lake ecosystems and our own environmental well-being. We'll explore the role people and nature play in water quality, the challenges lakes face today, and what happens when excess phosphorus enters a lake using Lake Kanasatka in NH as an example. Attendees will come away with simple, practical ways you can help protect and improve lake health in your own community.

Thursday, February 26

3:00 P.M.

AIL Classroom, Lethbridge Lodge

Free to attend. Pre-registration required.
