The GP40 series were considered the gold standard of four-axle locomotives, with over 1,000 examples built for 30 different railroads in North America, starting in late 1965. Today, many still are in operation, either in their as-built form or having been rebuilt.

For our surprise run of GP40s, we bring you Western Pacific's dynamic Bicentennial duo: the 1776 and the 1976, in their striking all white with red and blue trim. These will come in a commemorative wooden case and a signed certificate of authenticity. How do we follow that up — with ANOTHER Bicentennial locomotive, of course! Enter the Missouri-Kansas-Texas's GP40, number 200! Joining number 200 is four roadnumbers of the attractive MKT red schemed GP40s. Finally, we have Illinois Central's "Final Four" that continue to operate for CN, on their busy lines radiating out of the Chicago area. These will feature current day details and a matte black finish, to simulate the wear and tear they've seen over the years. All of these models will be very limited, so make sure you get your orders in ahead of time! They won't last long on the shelves.

The Standard Rapido GP40 Locomotive features:

- Road-specific details for each model
- Rapido's innovative dead straight metal side handrails with plastic stanchions
- Incredible underframe detail including traction motor cables, air filters
- Separate metal grab irons and handrails installed at the factory
- Operating headlights, rear lights, white class lights, ditch lights and beacons (where appropriate).
- Highly detailed cab interior
- Appropriate cab or nose headlights and Gyalites (where appropriate)
- Road-specific battery box doors
- Correct fuel tank sizes per road number
- Multiple styles of stepwells
- See-through, etched steps
- Cannon and Company licensed fans
- Detailed Blomberg B truck with traction motor details
- Multiple dynamic-brake hatches and air ducts
- DC/Silent (21-pin DCC Ready) or DC/DCC/ESU LokSound
- MoPower capacitor system for uninterrupted DCC power
- Suggested minimum radius: 18"
