- **FIRST TIME IN PLASTIC – THE GP39 AND THE SWMT SLUG – ALL POWERED!**
- **VERSATILE LOCOMOTIVE OF THE 1970s INTO THE MID-2010s**
- **GP39 MOTHER+SLUG SETS AVAILABLE IN UNIQUE SCHEMES**

Rapido Trains is proud to present the EMD GP39 locomotive in HO scale! Following the highly successful GP38 and GP40 models, the GP39 brings the same high-end, road-specific details with a powerful motor and those razor-sharp graphics you're accustomed to from us.

The EMD GP39 locomotive was unique in that it featured a 12-cylinder, turbocharged 645E3 prime mover — 4 cylinders fewer than the straight GP38. The largest purchaser of the GP39 was the Chesapeake & Ohio, ordering 20 locomotives. Upon the Chessie and Seaboard merger, the GP39s continued in local and yard service for CSX Transportation. While some locomotives and slugs would wear a variety of patchout or early CSX Y schemes, most of the fleet was repainted into the YN2 scheme and eventually the current YN3 scheme.

The EMD GP39 Locomotive and SWMT Slug features:

- **The GP39 Locomotive – A first in plastic!**
 - Road-specific details for each model
 - Rapido's innovative dead straight metal side handrails with plastic stanchions
 - Incredible underframe detail including traction motor cables, air filters and a whopping amount of separately applied parts
 - Road-specific battery box doors
 - Separate metal grab irons and handrails installed at the factory
 - Operating headlights, rear lights, white class lights and ditch lights and beacons (where appropriate)
 - Highly detailed cab interior
 - Correct fuel tank sizes per road number
 - See-through, etched steps
- **Powered SWMT Slug – A first in plastic!**
 - Separately applied wire grabs
 - **Cannon and Company licensed fans**
 - Multiple dynamic-brake hatches and air filters
 - DC/Silent (21-pin DCC Ready) or DC/DCC/ESU LokSound
 - MoPower capacitor system for uninterrupted DCC power
