

53' Husky-Stack & 53' high-cube container

The Gunderson 53' single-unit double-stack well car is the latest iteration of the famous Husky-Stack and every intermodal train includes at least three or four cars of this type. This is accompanied by a newly tooled 53' high-cube container with riveted sheet/post sides and optional heater box/fuel tank.

Six numbers per paint scheme will be offered along with an undecorated kit. Each well car comes with a pair of randomly selected 53' high-cube containers.

Our well car features a die-cast body with injection moulded plastic running boards, end handrails and brake detail. The trucks are a brand new free-rolling 70-ton design with three springs visible and 33" wheels designed to the same specification as our highly regarded 52'6" mill gondola. The car is factory-installed with metal Macdonald-Cartier knuckle couplers.

The 53' container introduces a new design never before offered in quality form in HO Scale. We will be producing eight paint schemes, four Canadian and four classic US liveries, along with undecorated.

Order deadline November 18th, 2016. Delivery expected mid-2017.

Well Car w/2 containers: US \$49.95 CDN \$59.95
Containers (2-pack): US \$24.95 CDN \$29.95
