N Scale VIA F40PH-2D

ESU LOKSOUND
EST. 1999

VIA's F40PH-2D has been the face of passenger train travel in Canada since the 1980s and while there have been a number of inaccurate F40 models painted in VIA colours, there has never been an accurate N scale model of this 3000-horsepower Canadian workhorse. Until now.

The F40PH-2D was built in London, Ontario between 1986 and 1989. It features a desktop control stand (hence the "D" in the designation); a unique fuel tank and underframe arrangement; a unique carbody design with custom panel and door locations; and numerous other Canadian-only details.

Our VIA Rail F40PH-2D features:

- Scaled from original blueprints and field measurements
- Unique Canadian F40PH-2D body and details
- Working headlights, ditch lights, number boards
- Separate grab irons and handrails installed at the factory
- Incredible underbody detail including separate piping
- Different rooftop details for different paint schemes
- Accurate F40PH-2D sounds on sound-equipped models
- Available in original scheme (1986-1998) and Canada scheme (1998-2014)

N Scale VIA Rebuilt F40PH-2D

In 2010 VIA Rail Canada contracted CAD Railway Industries in Lachine, Quebec, to rebuild its F40 locomotive fleet. This involved removal of the HEP (Head End Power) alternator and installation of a separate HEP generator in the rear of the locomotive. At the same time the locomotive was given VIA's green, grey and yellow Renaissance paint scheme first seen on the P42DC locomotives in 2001. By the end of 2012 all 52 F40PH-2D locomotives had been rebuilt.

Rapido Trains Inc. is delighted to introduce the only N scale model ever produced of this uniquely Canadian passenger workhorse.

Our VIA Rail Rebuilt F40PH-2D features:

- Scaled from original blueprints and field measurements
- Unique Canadian F40PH-2D body and details
- Working headlights, ditch lights, number boards
- Working emergency headlight and emergency shutdown strobe light
- Separate grab irons and handrails installed at the factory
- Incredible underbody detail including separate piping
- Different rooftop details for different paint schemes
- Accurate Rebuilt F40PH-2D sounds on sound-equipped models
- Available in Renaissance Scheme and \$10 bill edition

**ORDER DEADLINE
AUGUST 17TH, 2020**

In 2013 the Government of Canada issued a new polymer \$10 banknote featuring The Canadian on the verso (back). The locomotive was number 6403 and the VIA logo was replaced by the Canada wordmark.

We're offering a special limited run of the \$10 bill version of 6403, complete with the Canada wordmark. As an added bonus, 25 of the locomotives will have \$10 bill hidden in the box.
