Introducing the all new HO scale Pacific Car & Foundry B-100-40 boxcar from Rapido Trains Inc!

With 250 cars delivered exclusively to the Southern Pacific in 1976, these exterior-post boxcars featured a 5195-cu ft capacity, full Hydra-Cushion underframe, 12' doors, Car Pac loaders and the iconic half-height waffle sides. Used across the SP system, these utilitarian boxcars could be seen throughout the USA and Canada. Most of the series are still in service today, many for SP successor Union Pacific and others in short line service.

Several cars from this series were purchased from the SP by Amtrak in the mid 1990's for use in express service on most trains across the system. These cars had some minor modifications including the large wheel door handle, brackets for the end of train device and struts added to the trucks for extra stability at higher speeds. Reserve today!

Rapido's B-100-40 model features:

- Separately applied metal grab irons and cut levers
- Detailed Hydra-Cushion underframe
- Full underbody brake rigging
- Scale sized draft gear
- Genuine Kadee #158 Whisker couplers
- Newly tooled trucks with turned metal 36" wheels
- Separate door rods and door tracks
- Accurate paint and lettering
- Available in singles or multi-packs.*
- Road number specific paint patches where appropriate

* Dealers must order multi-packs.

Preliminary samples, subject to revision.
