**EXPECTED MID 2021
ORDER DEADLINE OCT 15, 2020**

Rapido is pleased to announce our latest freight car in HO Scale, the Procor 20,000 gallon General Purpose tank car, also called the Procor GP20 (no, not the locomotive).

Founded in 1952, Products Tank Line (renamed Procor in 1962) constructed their manufacturing plant in the mid 1950's in Oakville, Ontario. Initially, engineering was supplied by parent Union Tank Car Company. In the 1960's, Procor assembled their own engineering department and crafted a series of standard design tank cars which paved the way for a new generation of equipment, with many modern designs reflecting this new standard. The GP20 (again, the tank car and not the locomotive) was suitable for lighter density commodities which would not congeal or freeze in cold weather, such as various oils and fuel. The same car could also be equipped with interior heater coil pipes, such that the contents could be reheated. The same basic design - including tank diameter and length - was manufactured from 1969 through until 1984. The GP20 was constructed with both 70 ton and 100 ton capacity trucks. Later designs were also equipped with a separate fittings dome (in addition to the manway assembly fitting), which allowed the tank rating to be upgraded from 60 psi to 100 psi.

When production of the GP20 tank car was completed in 1984, Procor had built almost 1000 cars of this design. They are in use across North America in both fleet service and lease service to numerous companies. Common reporting marks carried by these cars included UTLX (Union Tank Car), PROX (Procor), NCTX (North American Car Co.), BCOL (British Columbia Railway), and CP (Canadian Pacific Railway).

The Rapido 20,000 gallon General Purpose Tank Car features:

- Drawn from original blueprints and drawings
- Artworks sourced from original design drawings and photos
- Photo-etched metal walkways
- Detailed vent stacks, loading hatches, air tanks and braking equipment.
- Kadee #158 (scale) or #119 (scale shelf) whisker couplers installed, as appropriate
- Early style features 70-ton trucks with 33" wheels and an exposed drain valve.
- Late style features 100-ton trucks with 36" wheels and a reinforced drain valve housing.

Note: All schemes are available in either 4-pack or 6-pack cases, as well as single cars. Car numbers for single orders will be randomly selected from the listed road numbers. Unnumbered cars are available by special request only. Please contact for details.
