Rapido is proud to announce the EMD and GMDD SW9 Locomotive!

The SW9 locomotive continued Electro-Motive Division's excellence of small, compact "switcher" engines for yard and local service. From November 1950 to December of 1953, nearly 800 SW9s were built in the La Grange production facility. Meanwhile, in London, Ontario, GMDD rolled out 29 for Canadian National and Canadian Pacific. The SW9 was outfitted with the popular 567B prime mover, while a handful received the upgraded 567BC prime movers that would later be the power of the SW1200 series. A staggering 69 railroads (industrial, short lines and class one roads) would purchase the SW9! The Illinois Central received 70 SW9s, which was the largest order of the production run.

The SW9 Locomotive Features:

- Highly detailed cab interior
- See-through metal etched parts
- Many road-specific details
- Heavy diecast frame
- Diecast gear boxes for added weight
- Rapido semi-scale metal knuckle couplers
- Full LED lighting, including: operating beacons/flashing lights where appropriate
- DC/Silent (21-pin DCC Ready) or DC/DCC/ESU LokSound
- MoPower capacitor system for uninterrupted DCC power
