Introducing the Chicago Transit Authority Budd 2600-series railcars in N scale! These cars have been in service for over 40 years, and we will feature their present day look on all models.

Each offering comes as a married pair like the prototype. Cars will feature headlights, marker lights, a numberboard light, and interior lighting. The power car uses a unique low slung motor design to still allow an open interior, even in N!

Also consider four-car Collectors set, which are a great display or fast way to build out a train! A 4-car set will come with one powered/unpowered pair, and one pair of two unpowered cars.

THE N SCALE CTA 2600 BUDD SERIES 'L' CAR FEATURES:

- Designed from original factory drawings and field measurements
- DC/DCC ready or Dual-Mode DCC/Sound
- Two-car sets feature one powered and one unpowered 2600-series car
- Suggested minimum radius: 9 3/4"
- Operating headlights, marker lights and interior lighting on both ends
- Detailed underbodies
