6-Pack: \$359.70 USD

Single: \$69.95 CAD
6-Pack: \$419.70 CAD

Did you know that in 2021, more than 561,000 carloads of steel traversed the rails in North America? Throughout history, transporting steel coils has been a staple of the rail industry. These rolled steel sheets have been transported by all sorts of gondolas or specialized railcars. The Transverse Coil Car is Greenbrier's answer to the coil steel railcar market. This five-trough coil gondola can house up to five rolled steel coils in various sizes, reducing the number of trucks on highways carrying multiple smaller steel coils. As of mid-2024, Greenbrier has produced over 2,500 of these cars with more on the way. Rapido is proud to offer this modern car full of details, taken right off of the original drawings! You'll want a fleet of these small but important coil cars operating on your layout!

The Rapido HO Scale Greenbrier Transverse Coil Car Features:

- Original car drawings used along with field measurements
- Durable metal underframe gondola for maximum weight
- Etched-metal walkways
- Metal grab irons and cut lever
- Highly detailed underframe
- Semi-scale metal knuckle couplers
- 100-ton trucks with profiled metal wheelsets
- Available as single car or six-packs unless noted
