HAAS REPAINTS

The New Haven Railroad Historical & Technical Association and Rapido Trains Inc. have teamed up to offer the iconic EMD FL9 (EDER-5) in a new paint scheme variation available exclusively from the NHRHTA!

Named after Robert Haas, the New Haven paint shop foreman, at least fourteen FL9s were repainted in the 1960s by the railroad's own paint shop. These repaints were similar to their "as-built" scheme, but had several differences:

The NH Haas Repaint Variation:

- NH Serial #409 Red-Orange instead of NH Serial #406 Orange-Red
- The area just above the stainless steel grille is black, not white
- All the nose and rooftop grabs are NH Serial #409 Red-Orange
- The nose logo and each "N" in "NEW HAVEN" on the sides are lacking the extra lower right "N" serif
- The rear loco road numbers were not applied

**ORDER DEADLINE:
APRIL 15, 2026**

Our HO Scale Model Features:

- Correct details for a post-1960 EDER-5 with nose MU
- Full underframe detail including piping and conduits
- Etched-metal "No-Warp" grills
- See-through roof-top fans
- Operational headlight, back-up light, class lights, and number boards and a full cab interior
- Either sound-equipped with an ESU LokSound V5 DCC decoder or DC (DCC-ready with a 21-pin socket)
- MoPower equipped for uninterrupted loco power!
- Authentic sounds including Hancock air whistle and 3rd rail mode traction motor sounds without the diesel
- Rapido's 5-pole, skew-wound motor and silky-smooth drive system
- Macdonald-Cartier metal knuckle couplers

NOTE: These models will be the darker #409 Red-Orange and will not match any other NH FL9, but that is accurate (see photo at left).

A minimum of 50 models of each road number are being made.

ORDER DEADLINE APRIL 15, 2026

For the First Time in Ten Years, the New Haven FL9 Returns!

In addition to the NHRHTA Exclusive FL9 Haas Repaint scheme in two road numbers (see other side), Rapido Trains Inc. is also offering twelve more road numbers in the three New Haven variations for general release: EDER-5, EDER-5 "Modernized," and EDER-5A. They can also be ordered directly through the NHRHTA using this order form.

The 1957-built EDER-5 (2000-2029) has nose MU doors on either side of the headlight, a roof-mounted cooling coil and an optional roof pantograph for GCT use. The EDER-5 is "Modernized" with a side walkway and side nose and roof safety grabs as mandated by the FRA in 1960. In 1960, the EDER-5A (2030-2059) were delivered. They lack both the nose MU doors and the roof cooling coil, never had a roof pantograph, and came with the extra safety grabs straight from EMD. All were painted in the brighter New Haven Serial #406 Orange-Red paint.
