

# G.E.M.S.

## GIRLS IN ENGINEERING, MATH AND SCIENCE

### ABOUT US

Girls in Engineering, Math, and Science (GEMS) is a science, technology, engineering, and math (STEM) enrichment program for 7th and 8th-grade girls currently attending a Seattle public school. The goal of the program is to encourage girls to maintain and broaden their interest in STEM topics by providing hands-on activities, mentoring, field trips, and information about a variety of fields.

#### Activities

GEMS activities occur once a month during the school year period. The program is free.

#### Who funds the program

GEMS is funded by annual dues from the Seattle Area chapter of the Association for Women in Science (AWIS-SA) membership and is led entirely by volunteers.

#### Who can participate

Any 7th or 8th grade student who identifies as a girl and is currently attending a Seattle public school is welcome to apply.

#### How do I apply

Applications as a participant open every school year. If you would like to be notified when next year's GEMS application opens, please send an e-mail to [seattlegems@gmail.com](mailto:seattlegems@gmail.com)
