

GRAND OPENING CELEBRATION

AUGUST 18TH, 2022 | 10AM - 3PM

**KOHLER
TRAINING**

**AWARD
WINNING BBQ**

PRIZES

**SAVINGS
ON IN-STOCK
GENERATORS**

When your house or business loses power,
life gets disrupted, but not if you have a Kohler Generator.

In business since 1985, Palco is the exclusive
distributor for Kohler Powers Systems for
WV, Western PA, and Western MD.

KOHLER
IN POWER SINCE 1920.
GREAT POWER COMES
FROM GREAT GENERATORS
RESIDENTIAL • COMMERCIAL • INDUSTRIAL • PORTABLE • 24/7 EMERGENCY SERVICE

KOHLER
IN POWER. SINCE 1920.

Palco
SALES CORP

3317 State Route 34, Winfield, WV 25213 | 304-586-3838

Generator 101:

Basics & Application - 1 PDH | 11:00am - 12:00pm

In this course we will discuss the why and how of generator sets. First, we will explore which codes and standards drive the need for generator sets. Then we will look at the building blocks of generators, how to apply them and what to look out for when installing an emergency power system.

Objectives: After this course, you will be able to:

1. Explain the fundamentals and components of emergency power systems.
2. Specify and explain how an emergency power system is installed.
3. Verbally identify some of the potential challenges when designing or installing an Emergency Power System.

Sizing 101:

Basics & Sizing Tool - 1 PDH | 1:00pm - 2:00pm

Generators have several factors that need to be considered when appropriately sizing for a project other than the summation of kW. We will investigate how various parameters of the project (ambient conditions, load details, stepping, code requirements etc.) must all be considered when optimally sizing a generator set. We will illustrate using Kohler Power Solutions Center how implementing certain design criteria can help reduce the kW rating specified.

Objectives: After this course, you will be able to:

1. Explain the basic load types applied to generator sets.
2. Identify the relevant characteristics of generator that affect load response and size of the generator.
3. Use a generator sizing tool to optimize the generator set requirements.

Classes include PDH credits!

PLEASE RSVP BY 8/12/22 to Skye Reveal
sreveal@palcogenerators.com.
