# Sharing Church Activity Photos

After you have photographed the image, you will find it in your photos.

Select the image you want to work with.  Click "Edit" in the top right of your screen.

On the bottom of your screen, you are given the options to crop, filter or change the exposure or color of the image.
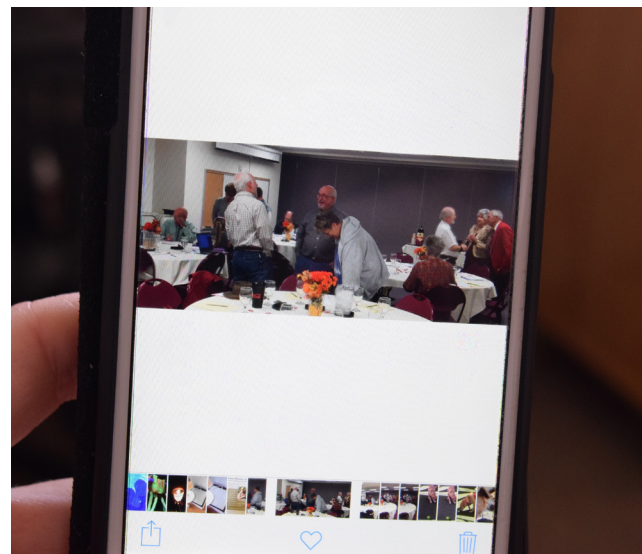

There is too much ceiling and table visible, which distracts the viewer from the focus of the picture. This image needs to be cropped. The first icon on the bottom is the cropping tool. Once the crop tool is clicked, a grid system pops up which allows you to crop the image easily. There is also a RESET option, if you change your mind. Click Done or Cancel to return to the main menu.

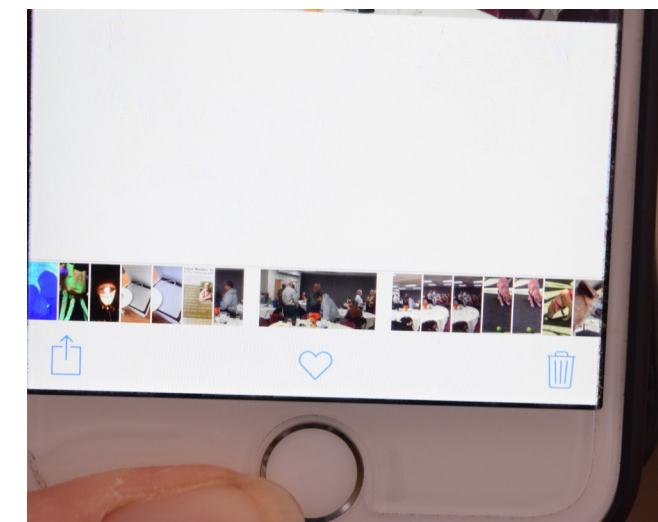

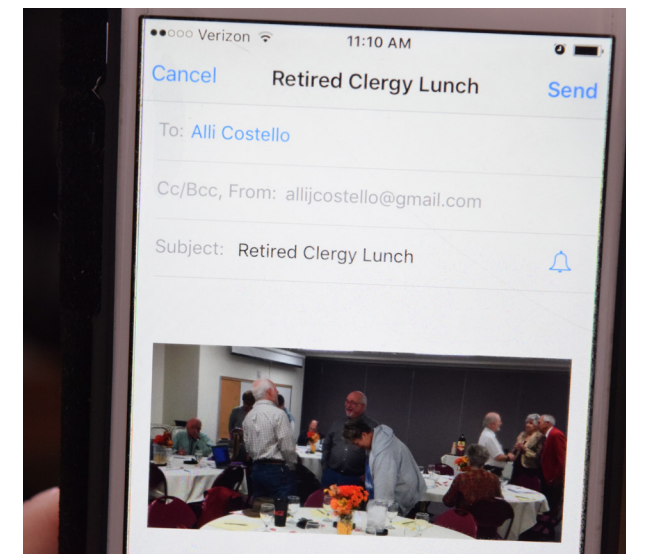

The next screen provides the share options. The best way to send your images to the Conference Office is via email, unless they're super large (more than 2 MB).

You are ready to send the image. You will see an icon on the bottom of the screen with a box and an arrow. That is your share icon.

Send your images to alli@nmconfum. com. Please include the name of the church in the subject line & if it will fit, an abbreviation of the activity. A narrative is also appreciated.

If this image has not been sent before, a window will pop up to ask what size you want it to be sent. You want to send your images as large as you can. A good rule of thumb is keeping it below 2 MB. So this photo can be sent in its Actual Size. Keep in mind that if you are sending multiple photos, you should either send them separately or Large. It is best to edit them before sending, especially if they are large images.
