

Instructions for Making a Basic Chatterbox Activity:

Step 1. Print either the blank square or the completed square. You can use the blank square to create your own questions or use the one that we've filled in for you.

Step 2. Cut out the square. You can let your student cut out the square, if you prefer. If you use the completed square, place the printed side down.

Step 3. Fold the square diagonally, then unfold it so you are back to the square.

Step 4. Fold the square on the other diagonal, then unfold again so you are back to the square.

Step 5. Fold each of the four corners to the center of the square. You will have a smaller square with each of the original corners meeting in the middle.

Step 6. Flip the whole thing over.

Step 7. Fold each of the four corners to the center of the square again. You will have an even smaller square.

Step 8. If you chose the blank template, lift the flaps and write a question on each flap. Then, put the flaps back down.

Step 9. Write the numbers 1 – 8 on each of the triangles.

Step 10. Flip it over and color or write the name of a different color on each flap.

Step 11. Fold the square in half, unfold it, then fold it in half the other way, and unfold it. This step is to make creases.

Step 12. Flip it back over. Stick your two thumbs and two forefingers into each of the four flap pockets. Slip your fingers all the way up to the corners and then bring your fingers together. Your fingers should press the center creases so that all 4 flaps meet at a point in the center. *Don't worry if this step is confusing. Your student should be able to help you!*
