Accessing LVHN Library Resources in Citrix

LVHN issued Student HP thin client

Some LV library resources will not work with the older Explorer browsers. They require the newer Edge or Chrome browser.

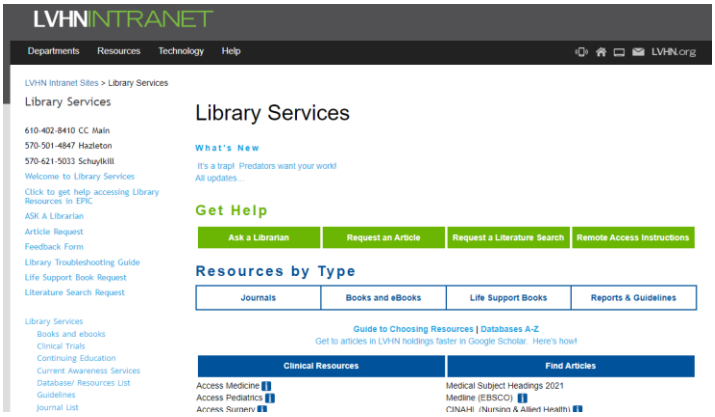

If you are using your LV issued HP thin client laptop and you are in the Global Win 7 VDI, you do not have Edge installed.

Global Win 7 VDI work around for the missing Edge browser:

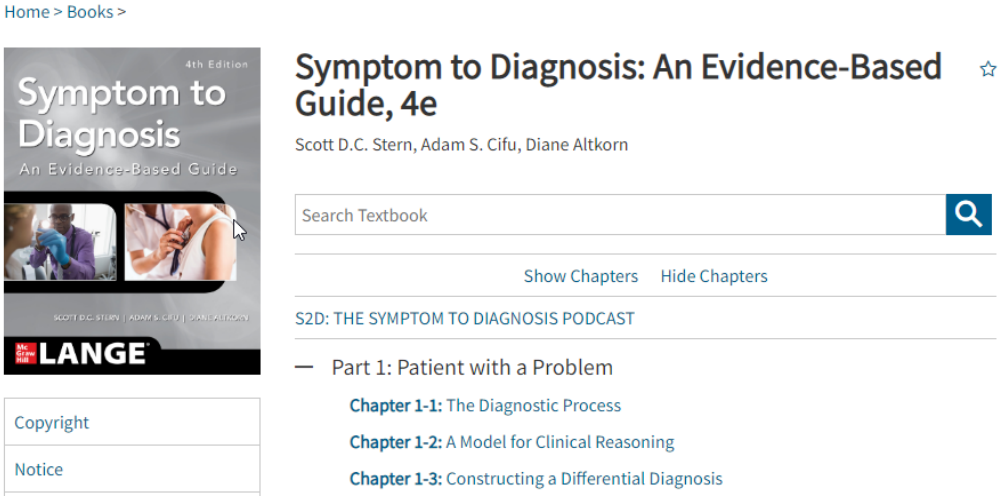

1) Open Chrome and go to http://library.content.lvh.com/

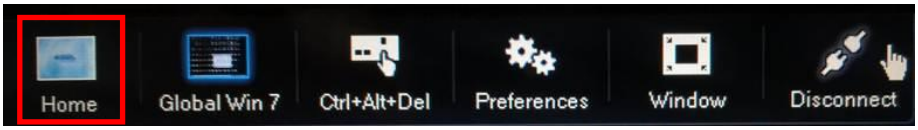

2) The Library resources that do not function in Internet Explorer will work.

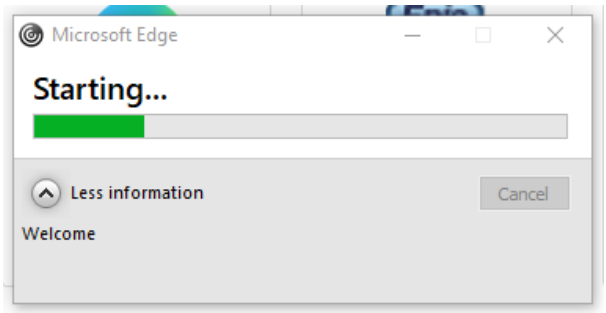

Finding the Edge Icon from Home screen

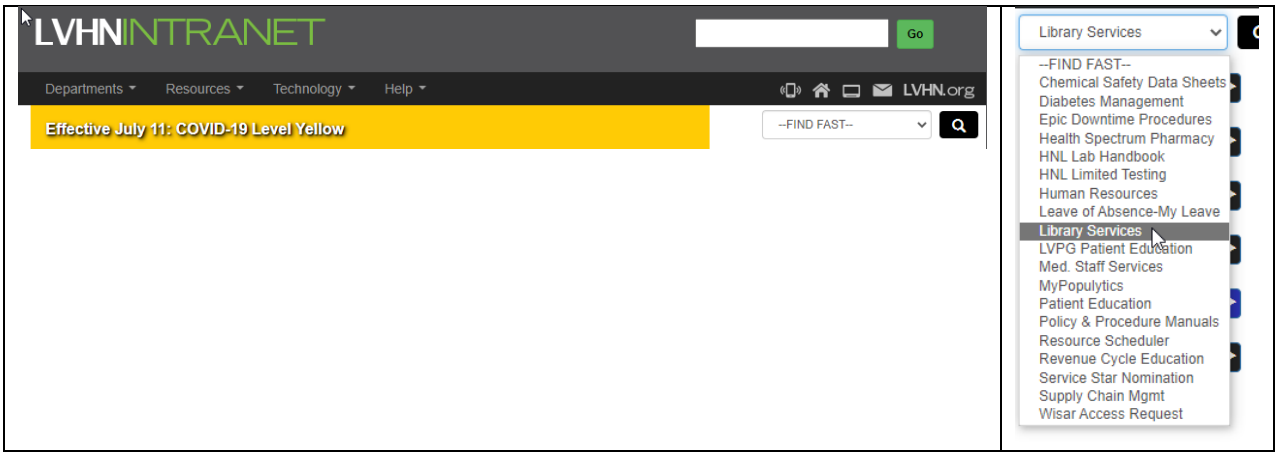

Click on Home and check the desktop for the Edge icon.

The Citrix OS will start.

The LVHN Intranet page will appear. Go to Find Fast and select Library Services

The Library Services page will display.
