## **The Science of Where**

The National Geographic Society will recognize Geography Awareness Week Nov. 12-16, including GIS Day that week. "GIS Technology is Changing Our World" is a free co-hosted event scheduled from 9 a.m. to 4 p.m. on Wednesday, Nov. 14 2018 to provide students with area school districts, local residents and area professionals the opportunity to learn more about GIS applications and to see their use in action. GIS Day is observed globally and builds awareness about geographic information system (GIS) technology and the impact that GIS applications have on a variety of natural, physical and social sciences' fields of study and occupations. Certainly STEM related fields. GIS Day is a series of multiple overlapping two-hour sessions of activities and demonstrations that illustrates how GIS is a part of our everyday lives. The agenda suggests a sampling of the GIS Day Event. We would like to present these activities and demonstrations to as many visiting campuses as possible during the event time frame available from 9:00 AM – 4 PM. Please contact me within the next few weeks to answer any questions you may have and hopefully schedule a time frame for your campus to attend our GIS Day Event Del Mar College Center for Economic Development. You and your students will benefit from this global GIS Day initiative. "Celebrate Your World with GIS."
