1. AMI Asset Management Corporation ("AMI") claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. AMI Asset Management has been independently verified for the periods January 1, 1998 through December 31, 2017. The verification reports are available upon request.

Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. Verification does not ensure the accuracy of any specific composite presentation.

2. AMI is an independent investment management firm registered with the Securities and Exchange Commission. AMI was established in 1994; however, we did not start investing on clients' behalf until 1998. AMI manages equity and fixed income accounts for our clients. We offer seven investment options: Domestic Large Cap Growth Strategy, Domestic Small Cap Growth Strategy, Domestic Small-Mid Cap Growth Strategy, Domestic Large Cap Equity Income Strategy, Government/Corporate Fixed Income Strategy, Intermediate Quality Tax Exempt Strategy and a High Yield Capital Appreciation Strategy.

3. The Domestic Small Cap Growth Composite includes all fully discretionary, fee-paying and non-fee-paying, taxable and nontaxable accounts with at least \$100,000 in small cap equities on the last day of each previous quarter. AMI manages the Domestic Small Cap Growth Composite with the goal of achieving long term returns in excess of the Russell 2000® Growth Index through investing in quality small cap growth companies that trade at a discount to their fair values. The composite was created on October 1, 2008. There have been no changes in AMI's organization that has led to modification of historical composite results. Policies for valuing portfolios, calculating performance and preparing compliant presentations are available upon request.

4. Returns are presented gross and net of management fees and include the reinvestment of all income. Gross returns are presented before management fees but after all trading expenses. Net returns are calculated by deducting an annual fee of 1.50% from the quarterly gross composite return. The annual fee schedule for institutional accounts is as follows: 0.90% for the first \$10 million, 0.80% on the next \$15 million, 0.70% on the next \$25 million and 0.60% on the balance.

5. The benchmark we use is the Russell 2000® Growth Index which measures the performance of the small-cap growth segment of the U.S. equity universe. It includes those Russell 2000 companies with higher price-to-book ratios and higher forecasted growth values and includes the reinvestment of dividends.

6. The actual cash and cash equivalents are used in the performance of the composite.

7. Small cap securities tend to be more volatile than those of larger, more well known companies. This can lead to a greater chance of a larger decline when there are adverse issuer, political, regulatory, market or economic developments. Past performance is not indicative of future results. The performance information is supplied for reference. Results will vary among accounts.

8. Valuations and returns are computed and stated in U.S. dollars. The internal dispersion of annual returns is measured by the standard deviation of equal-weighted household returns presented within the composite for the full year. The three – year annualized standard deviation measures the variability of the composite and the benchmark returns over the preceding 36-month period. The standard deviation is not presented for 2008-2010 because monthly composite and benchmark returns were not available and is not required for periods prior to 2011. Accounts managed by AMI Asset Management Corporation do not make use of leverage, derivatives or short positions.

9. A significant cash flow is defined as a cash flow greater than 20% of the equity portfolio in the Domestic Small Cap Growth Composite during the quarter.
