Brianna's Story

By Yesenia Hernandez, LCSW, Bilingual Trauma Therapist

Brianna and her two siblings were referred for Safe from the Start (SFTS) services by a DCFS Intact Family Worker as they witnessed domestic violence in their home and were consequently dealing with their father's incarceration. Brianna's mother, Samantha, expressed concern over 8-year-old Brianna as she was increasingly angry, aggressive and was grieving her father. Brianna and her siblings engaged in individual Telehealth sessions, and their mother participated in some parent support sessions.

At the onset of therapy, Brianna greatly struggled to discuss thoughts and feelings related to her father and further struggled to express emotions related to the witnessed violence. After several months of rapport building, feelings identification and emotional regulation, Brianna was able to express mixed and complicated emotions surrounding her parents' separation. Brianna believed her parents' separation was a positive event; however, Brianna greatly missed their interactions and time together.

Brianna was also able to engage in the creation of an art-based Trauma Narrative that focused on processing the witnessed abuse and on strengthening her current sense of safety and security that her mother built following the separation. Upon the release of her father, Brianna engaged in sessions that focused on identifying safe adults and helpers in her life, as visits with him were set to take place. Brianna's mother also worked with an SFTS Therapist to discuss ways of maintaining safety during visit exchanges and in strengthening her own supports.

After a total of seven months, Brianna was able to successfully complete therapy. Brianna's mother shared that Brianna was no longer inappropriately aggressive and was able to channel her energy through soccer and her social life. Brianna continued to have contact with her father upon his release from jail and expressed feeling safe in both of her homes.

A Message of Hope from CAC's CEO

Melanie Pignotti, LCPC

Dear Champions for Children,

Fiscal year 2023 was a year of transformation and opportunity for the Children's Advocacy Center of North and Northwest Cook County (CAC). Following the retirement of the agency's long-serving Executive Director, a new leadership team with fresh perspective had the opportunity to assess the current state of the organization, identify areas of improvement with renewed focus on its mission and goals. This promoted a sense of excitement and motivation among the staff that led to improved connection, collaboration and communication, fostering a positive work environment and enhancing the overall organizational culture.

Despite the presence of refreshed optimism and momentum, the CAC encountered financial hurdles. Through diligent identification and proactive problem-solving, the organization successfully resolved and mitigated the financial issues it faced. The Board's financial committee was reinvigorated, and CAC initiated collaboration with an external accounting firm. CAC shifted focus to diversify revenue streams and boost individual and major donations. A dedicated Grants Coordinator position was established to ensure the acquisition of foundation and corporate funding. CAC's fundraising events have been successful, playing a crucial role in maintaining the financial stability of the organization. These events have not only raised funds but also created a sense of community and increased awareness about the importance of CAC's essential services.

continued on page 6

A Message of Hope

cont.

CAC staff have shown incredible resilience in the face of challenging circumstances. Despite unexpected situations that have arisen, they have consistently demonstrated unwavering determination and resiliency. They have remained steadfast in their commitment to their work, showing a remarkable level of perseverance even when facing adversity. Their resilience is truly inspiring and serves as a testament to their dedication and professionalism. In effort to better understand our clients' needs, programs and services were carefully evaluated. The Forensic and Advocacy Services program made changes to its schedule, extending its hours to better serve children, families, and our law enforcement partners. Several staff were cross-trained in Forensic Interviewing to enhance unique abilities and availability.

CAC's mental health programs have made significant strides in enhancing their service delivery. They have revised their case criteria to better align with their scope of service, ensuring a more tailored approach to each client's needs. Additionally, they have adopted valid and reliable screening and assessment measures, which have proven to be effective in identifying and addressing mental health issues. Lastly, they have formalized a utilization review process, which allows for continuous monitoring and improvement of their services. These collective efforts have significantly improved the treatment outcomes and overall experience for clients.

Going forward, CAC's attention is centered on its vision and strategic planning while carefully considering our recently established core values. I feel a deep sense of honor and privilege in my role, as well in the opportunity to collaborate with a dedicated board of directors and a team of selfless staff members. In closing, I extend heartfelt appreciation to everyone who has contributed to the CAC throughout the past year, enabling us to offer the best possible services to child victims/witnesses and their non-offending family members who have survived various forms of violence.

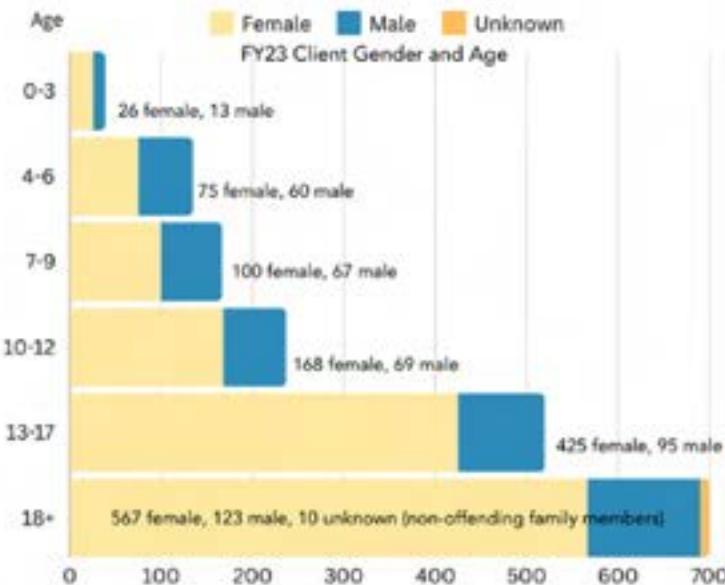

With gratitude,

Melanie Pignotti, LCPC

"My wish is that no family has to go through what we had, but in reality it happens. I hope for the victims and families that they will reach out to the Center for help and guidance." ~FY23 Client Parent

Forensic and Advocacy Services

A forensic interview is available to all children ages 3-17 in cases of alleged sexual or physical abuse or other crimes involving children as victims or witnesses.

445

forensic interviews conducted

CAC uses a collaborative approach that is child-focused and trauma-informed. This model protects the child's well-being and allows the child to tell their story once to CAC's Forensic Interviewer in a safe, neutral space at CAC while the Multidisciplinary Team (MDT) observes via a real-time live feed. The MDT includes law enforcement, DCFS, the State's Attorney's Office and mental health and medical personnel. They work together, using the forensic interview to determine the next steps in the investigative process.

All families using CAC's services are also paired with an Advocate who provides extensive support to the child and non-offending family members including:

- navigating the complex criminal justice system
- referrals to CAC's in-house mental health services (or outside medical or mental health care providers if needed)
- connections to other community resources for help with housing, food, legal or transportation needs

"I have a great partnership with the CAC. They are great at what they do, very sensitive in nature and allow feedback if need be. The rest of my peers share a similar experience when working alongside members at the CAC.

Keep up the great work!!!" ~2023 MDT Partner

Mental Health Services

CAC's Trauma Therapists work collaboratively to develop individualized treatment plans for each child survivor and their non-offending family members that address and work through past traumas. The goal is to help clients process and resolve trauma, build resilience and break cycles of abuse/violence. All therapy is free and offered in English or Spanish. Staff accept both in-house and outside therapy referrals for clients who qualify based on an assessment screening.

Therapy services include:

- Trauma-Focused Cognitive Behavioral Therapy (TFCBT)
- Eye Movement Desensitization and Reprocessing (EMDR)
- Play Therapy
- Art in Therapy
- Parent Support Groups
- Crisis Intervention

In addition, CAC's Safe from the Start program is a unique outreach for children birth to age 5 who have witnessed domestic abuse or are victims of abuse or neglect.

While "healing" looks different for every family, our goal is to ensure that they leave therapy knowing what happened to them is not their fault, that they feel safe in their world and that they are able to function better in daily life.

"... estuvieron pendiente de nosotras y fueron muy amable y su profesionalismo de todo el personal." ~FY23 Client Parent

Safe from the Start

CAC's Safe from the Start (SFTS) program is unlike any other in the area. We work with families who have experienced abuse to help each member on their path toward healing in a safe, therapeutic setting. What's truly unique about the program is that our therapy is offered to children ages birth - five years who have witnessed domestic abuse.

This program is offered free of charge and in English and Spanish.

Our Trauma Therapists use age-appropriate, evidence-based techniques such as:

- Eye Movement Desensitization and Reprocessing (EMDR)
- Trauma-Focused Cognitive Behavioral Therapy (TFCBT)

In addition, they incorporate principles from play therapy, art therapy and Mindfulness, working both with individuals and the parent and child together.

Safe from the Start also collaborates with a network of social service partners for referrals and wraparound support.

SFTS is staffed by four trained Trauma Therapists, all of whom have participated in the Illinois Coalition Against Domestic Violence (ICADV) 40-hour training program.

Q&A with Herb Horn, Immediate Past Board Chair

Q: Where did CAC grow in FY 23?
A: Growth significantly occurred in the agency being more efficiently restructured. Responsibility and authority was given to defined areas managed by directors reporting to the newly hired CEO. An outside financial agency was hired as an acting CFO, thus unburdening the CEO and being financially more competent.

Q: How did CAC respond to challenges?
A: 3 Words...Change Saved Us

Q: What was your biggest achievement as the Board Chair?
A: Helping guide our agency and the Board as its chair to make the necessary changes and support the new agency leadership throughout the year. In addition, overseeing successful succession planning in securing new board leadership.

Note...I'm really relieved FY 23 is behind us, but I do not regret having survived the experience.
