

Integrated Mechanical is a small, family-owned mechanical engineering design firm located in Fort Collins, Colorado. We are currently hiring a mechanical design engineer to join our team!

- Responsible for completing HVAC system and plumbing design from concept through construction administration and potential commissioning. Designs may include any or all of the following (and are not limited to):
 - Narratives
 - Schematics
 - Drawings
 - Details
 - Booklet Specifications
 - Reports
 - RFI's
- Consult on HVAC system and plumbing design for a wide range of projects, and work with other engineers, project managers, and construction professionals as needed to create and/or modify design parameters.
- Analyze HVAC systems and equipment when necessary to find inefficiencies or malfunctions and create solutions to optimize performance and increase the efficiency of operation.
- Communicate directly with customers to understand project requirements, goals, design specifications, and operational environments to evaluate cost, feasibility, and implementation of new HVAC/plumbing design.
- Expectation of a licensed Professional Engineer is to review, and stamp completed drawings.
- Other duties as assigned. Please refer to employee handbook for additional employment details.
