

## 7.7 Graphiq

CoreLogic has partnered with Graphiq to provide access to property and community data visualizations within Matrix that directly leverage CoreLogic data—as well as data from the U.S. Census Bureau, Department of Education, American Community Survey, and more.

Using the Graphiq Real Estate API, CoreLogic can create Matrix reports with fully responsive data visualizations, including data such as property lot, tax and transaction information in addition to local real estate trends, school ratings, commute times, crime rates and demographic breakdowns. These striking visual representations provide deep insights and valuable context about properties and communities.
