

Getting to Net-Zero

A Presentation via Zoom by

Rev. Dr. Patricia Tull

Tuesday April 27th, 7:30 PM EDT

Caring for creation entails quickly finding our path to renewable energy. This reality influences choices in where and how families live. Using her own net-zero home as a model, Dr. Tull will overview some of the promising ways homes can be built or renovated to become efficient enough to power not only themselves but family transportation and food production.

Rev. Tull is an environmental theologian, Professor Emerita at Louisville Presbyterian Seminary, and author of *Inhabiting Eden: Christians, the Bible, and the Ecological Crisis*. Formerly program director for Hoosier Interfaith Power & Light, she has taught and led earth care efforts among people of faith for the past fifteen years. She and her spouse Don Summerfield live in Henryville, Indiana.
