

Clinical Integration Updates

February 23, 2023: In the interest of providing practices with timely information regarding activities in Cerner HealtheRegistries and the Clinical Integration program, we provide this update for program information, known issues and scheduled fixes, and system enhancements.

★ New update

Key Message	Target Audience	
	PCP	Specialist
★ 2023 program measures in Registry The 2023 program measures were visible in Cerner HealtheRegistries on Feb 13th. Scorecards will be updated by early March to reflect the full 2023 program.	X	X
★ 2023 specialty grids The 2023 program specialty grids are available on the Introducing CI 2023 page on APP Pro.	X	X
2023 update webinar and measure guides on APP Pro Check out the Introducing CI 2023 page on APP Pro for 2023 measure guides and to watch an on-demand webinar outlining key 2023 program updates and measure changes.	X	X
2022 appeals end 02/24 2022 appeals will be accepted for situations that negatively impact a provider's incentive earnings. The appeals submission period opened on Monday, Feb. 6, 2023 , and closes at 5 p.m. CST on Friday, Feb. 24, 2023 . Please review the appeals resources posted to the 2022 CI Appeals page on APP Pro. Appeals determinations will be communicated in Spring 2023.	X	X
CPT II codes not meeting HbA1c <8% fixed Issue causing CPT II codes without an HbA1c value not to meet the HEDIS HbA1c Control measure has been resolved. Please note that the measure was still able to be met by ACL and Quest results, MDE, and supported EMRs.	X	X
