

Feathery Houseguests During Covid-19

Who knew that Danielle Rampton and her family were accepting houseguests during this time of shelter-in-place? Well, this mama bird didn't exactly reserve a room but made herself and her eggs right at home! Danielle and her family noticed birds hanging out in the overhang and then to their surprise noticed a nest being built within two days! Within three days there was 1 egg and a few days later there were 3...and now they are up to 5 eggs!

This lovely little wreath on their side door has become home for this mama and her 5 eggs and Danielle and her family are really enjoying checking in on this little family and seeing life continue on during these times of distance. What a wonderful sign of love and hope!

Thanks for sharing, Danielle and family, and please keep us posted on the babies!
