

Doug Sheeran has been running his 3D printer 24/7 to print mask straps. These are being used in conjunction with N95 masks to alleviate the stress on individual's ears. Wearing these masks for long hours and long shifts can get very uncomfortable!

He has been doing this in conjunction with the [Nova Labs](#) community and over 1,000 pieces have been printed! Others in this community are sewing masks. Thank you, Doug, for being so giving of your time, materials, and talent for the people working so hard to keep us all healthy and safe!
