**Florida Department of Health Updates New COVID-19 Cases,
Announces One New Death Related to COVID-19, 6 p.m.
Update**

~299 positive cases in Florida Residents and 29 positive cases in non-Florida residents~

TALLAHASSEE — To keep Florida residents and visitors safe, informed and aware about the status of the virus, The Florida Department of Health has launched a [COVID-19 dashboard](#) that will be updated twice daily. Today, as of 6 p.m., there are 328 total** Florida cases. One person has died in Clay County who had previously tested positive for COVID-19. New Florida cases include:

- 14 additional positive COVID-19 cases (10 Florida residents and 4 non-Florida residents) reported to the Florida Department of Health.
- There are currently 299 positive cases in Florida residents and 29 positive cases in non-Florida residents.

Florida recently partnered with private laboratories around the state to expand COVID-19 laboratory testing capacity. This partnership will increase the number of tests conducted each day and ensure Floridians receive the critical health information they need in a timely manner.

Expansion to private laboratories changes the COVID-19 testing landscape in Florida. Private laboratories will run tests as they receive swab samples from practitioners. Testing and reporting times will vary among commercial and DOH laboratories. Demographic information may be updated during investigations. These twice daily reports reflect the state's efforts to accurately and transparently share information.

More information on a case-by-case basis can also be found [here](#).

For more detail on Florida resident cases, please visit the live DOH Dashboard [here](#).

* Florida residents that are diagnosed with COVID-19 and isolated out of state are not reflected on the Florida map.

**Total cases overview includes positive cases in Florida residents and non-Florida residents tested in Florida.
