

# Monoclonal Antibody Therapy

NCH is pleased to offer Monoclonal antibody therapy to our community. We currently have the Regeneron combination (casirivimab and imdevimab) available. This regimen is used for the treatment of mild to moderate coronavirus disease in adults and pediatric patients with positive results of direct SARS-CoV2 viral testing who are 12 years of age and older weighting at least 40KG and who are at high risk for progressing to severe COVID-19 and/or hospitalization. Treatment is to be administered as soon as possible after positive results and within 10 days of symptom onset.

## **Providers with NCH ordering privileges:**

Complete the attached order set and fax to the NCH Outpatient Infusion Center at **(239) 624-4371**.

For Pediatric Patients, fax the order set to **(239) 624-0061**.

## **Providers who do NOT have NCH ordering privileges:**

Contact NCH at **(239) 624-0940** for patient evaluation and treatment orders.

For additional information on this process, please contact Ellison Warner at **(239) 982-4200** Monday-Friday from 8am-5pm
