

FOR IMMEDIATE RELEASE April 30, 2020

Contact: Joint Information Center on COVID-19 for the State of Florida (850) 815-4940, ESF14@em.myflorida.com

**Florida Department of Health Updates New COVID-19 Cases,
Announces Fifty Deaths Related to COVID-19
~32,801 positive cases in Florida residents and 889 positive
cases in non-Florida residents~**

TALLAHASSEE — The Florida Department of Health, in order to provide more comprehensive data, releases a report on COVID-19 cases in Florida once per day. The Florida Department of Health COVID-19 dashboard is also providing updates once per day. The state also provides a report detailing surveillance data for every Florida county. Previously, this information was only available for select communities. The surveillance data report is available [here](#).

The Florida Department of Health also releases a list of long-term care facilities in Florida associated with COVID-19 cases with active cases in each facility in order to provide real-time data. The list of long-term care facilities with active COVID-19 cases is available [here](#). To date, 423 individuals that were staff or residents of a long-term care facility have died.

Today, as of 11 a.m., there are 497 new positive COVID-19 cases (483 Florida residents and 14 non-Florida residents) and fifty deaths related to COVID-19. There are a total of 33,690 Florida cases** with 1,268 deaths related to COVID-19.

While Florida's testing has increased over the past week, the percent of those testing positive for COVID-19 overall is 9 percent. On April 29, five percent of new cases** tested positive.

Since 11 a.m. on April 29, fifty people have died who tested positive for COVID-19 in Broward, Charlotte, Dade, Hernando, Lake, Lee, Manatee, Okaloosa, Orange, Palm Beach, Pasco, Pinellas and Polk counties.

Florida recently partnered with private laboratories around the state to expand COVID-19 laboratory testing capacity. This partnership will increase the number of tests conducted each day and ensure Floridians receive the critical health information they need in a timely manner.

Expansion to private laboratories changes the COVID-19 testing landscape in Florida. Private laboratories are running tests as they receive swab samples from practitioners. Testing and reporting times vary among commercial and DOH laboratories. Demographic information may be updated during investigations. These twice daily reports reflect the state's efforts to accurately and transparently share information.

More information on a case-by-case basis can also be found [here](#).

Confirmed Cases in Florida Residents	32,801
Confirmed by DOH	3,533
Tested by private labs	29,268
Characteristics of Florida Resident Cases	
FL resident diagnosed & isolated out of state*	9
Deaths	1,268
Cases in Non-Florida Residents	889
