

KNOW THE FACTS, GET THE VAX.

As of May 2021, over 1.35 Billion COVID-19 vaccine doses have been administered globally. Usual side effects are mild.

None of the COVID-19 vaccines authorized for use in the U.S. contain a live virus.

COVID-19 vaccines do not contain animal products. All components are safe for people.

Vaccine monitoring has historically shown that side effects generally happen within 6 weeks of receiving a vaccine dose.

mRNA vaccines cannot change your DNA, they only deliver information and teach your body to make a protein that triggers an immune response.

There is currently no evidence that COVID-19 vaccines cause any problems with pregnancy or fertility.
